

A Creative Moment

“Climbing, most of us agree, is a creative act. But what climbers create are not just routes, not just aesthetic statements, dotted lines up cliffs, articles in Climbing or Mountain, or footnotes in a guidebook. Climbers are busy creating their own personas and personalities, their own lives, as they climb.”
Lito Tejada-Flores, Summit Magazine, 1990

Climbing has changed a lot in the 31 years since Lito wrote those words. In the time it took for lycra to come, go, and come back again, an explosion of climbing gyms launched our fringe subculture into the mainstream, and created an enormous new generation of climbers. Today, this generation is transforming the sport, democratizing the crag, and bringing climbing to the world on the Olympic stage.

But for all that has changed, the essence of climbing as a creative act remains the same.

That’s why, at Evolv, our focus is climbers’ self-expression through movement, style, and the lines we draw on the wall. It’s the passion for original thinking that has fueled our scrappy attitude and inventive approach to getting shit done. For 2022, that includes projects like the redesign of the best-selling Shaman, down to our new collections of chalk bags—all part of the creative movement that’s shaping the future of climbing.

Climb On.

If the Shoe Fits

Why We’re Doing Away with Men’s and Women’s Models

In retrospect, we should have done it ages ago.

For years, we’ve heard from men who find their best fit in our lower-volume “women’s” models, and from women who find their best fit in our higher-volume “men’s” models. Which isn’t that surprising: fit has never been as simple as men having one kind of foot, and women another. In reality, when you’re looking for a shoe that’ll stand on a dime edge or smear up a blank slab, how it fits your unique foot is a whole lot more important that whether there’s an “M” or a “W” on the side of the box.

So for 2022, we’re doing away with men’s and women’s models. No more gender-specific colorways. Instead, we’ll offer our shoes in “medium-volume” and “low-volume” models, tagged with both men’s and women’s sizing. “Medium-volume” shoes are relatively wider, with higher insteps; “low-volume” shoes are relatively narrower, with lower insteps.

Which is best for you? Simply put: the one that fits. Which, when you think about it, is how it’s always been.

Shoe Comparison Graph

Camber

The camber (downturned shape) of the shoe determines how aggressive or neutral a shoe will feel and the type of climbing the shoe is better for. A high camber (scale 5) shoe will put your foot in a downward curled position better for overhanging climbs or putting more power on the toe. A flat shoe (scale 1) will be more comfortable for longer climbs and smearing.

Stiffness/Sensitivity

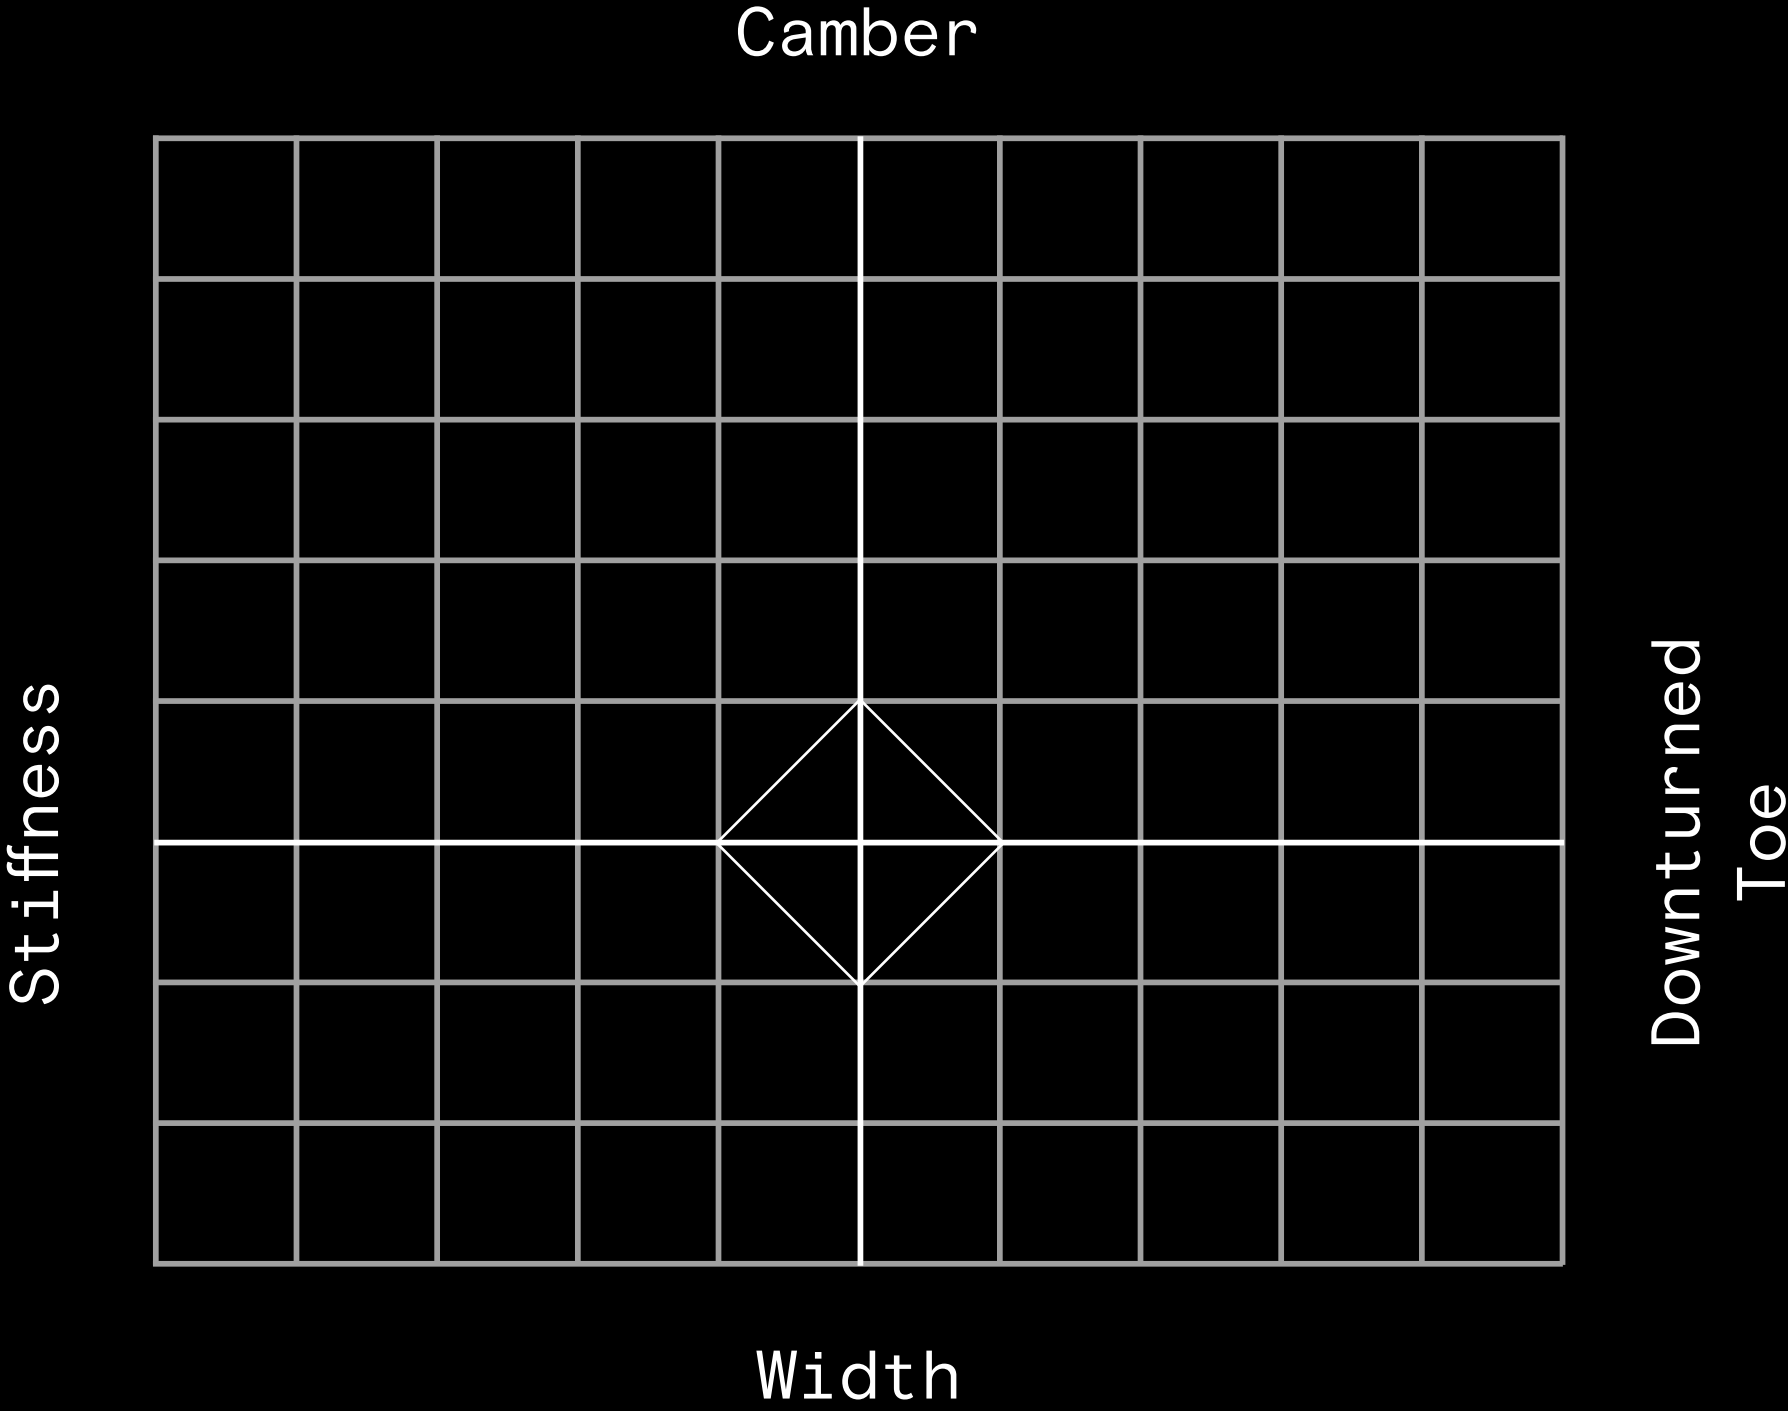

Stiffness and sensitivity is determined by the type and thickness of the midsole and the softness and thickness of the rubber. A stiff shoe will support more weight on a smaller area with less “feel” when edging and a softer and more sensitive shoe will allow the climber to feel the rock beneath the feet. On a scale of 1 to 5, a stiff shoe would be a 5 whereas a sensitive shoe would be a 1.

Downturned Toe

A downturned toe will put the big toe in a curled position to allow the climber to either climb steeper angles by pulling on the hold. A flat shoe (scale 1) will keep your toes fairly flatwhile a downturned toe high performance shoe (scale 5) will pre-curl your big toe when put on.

Width

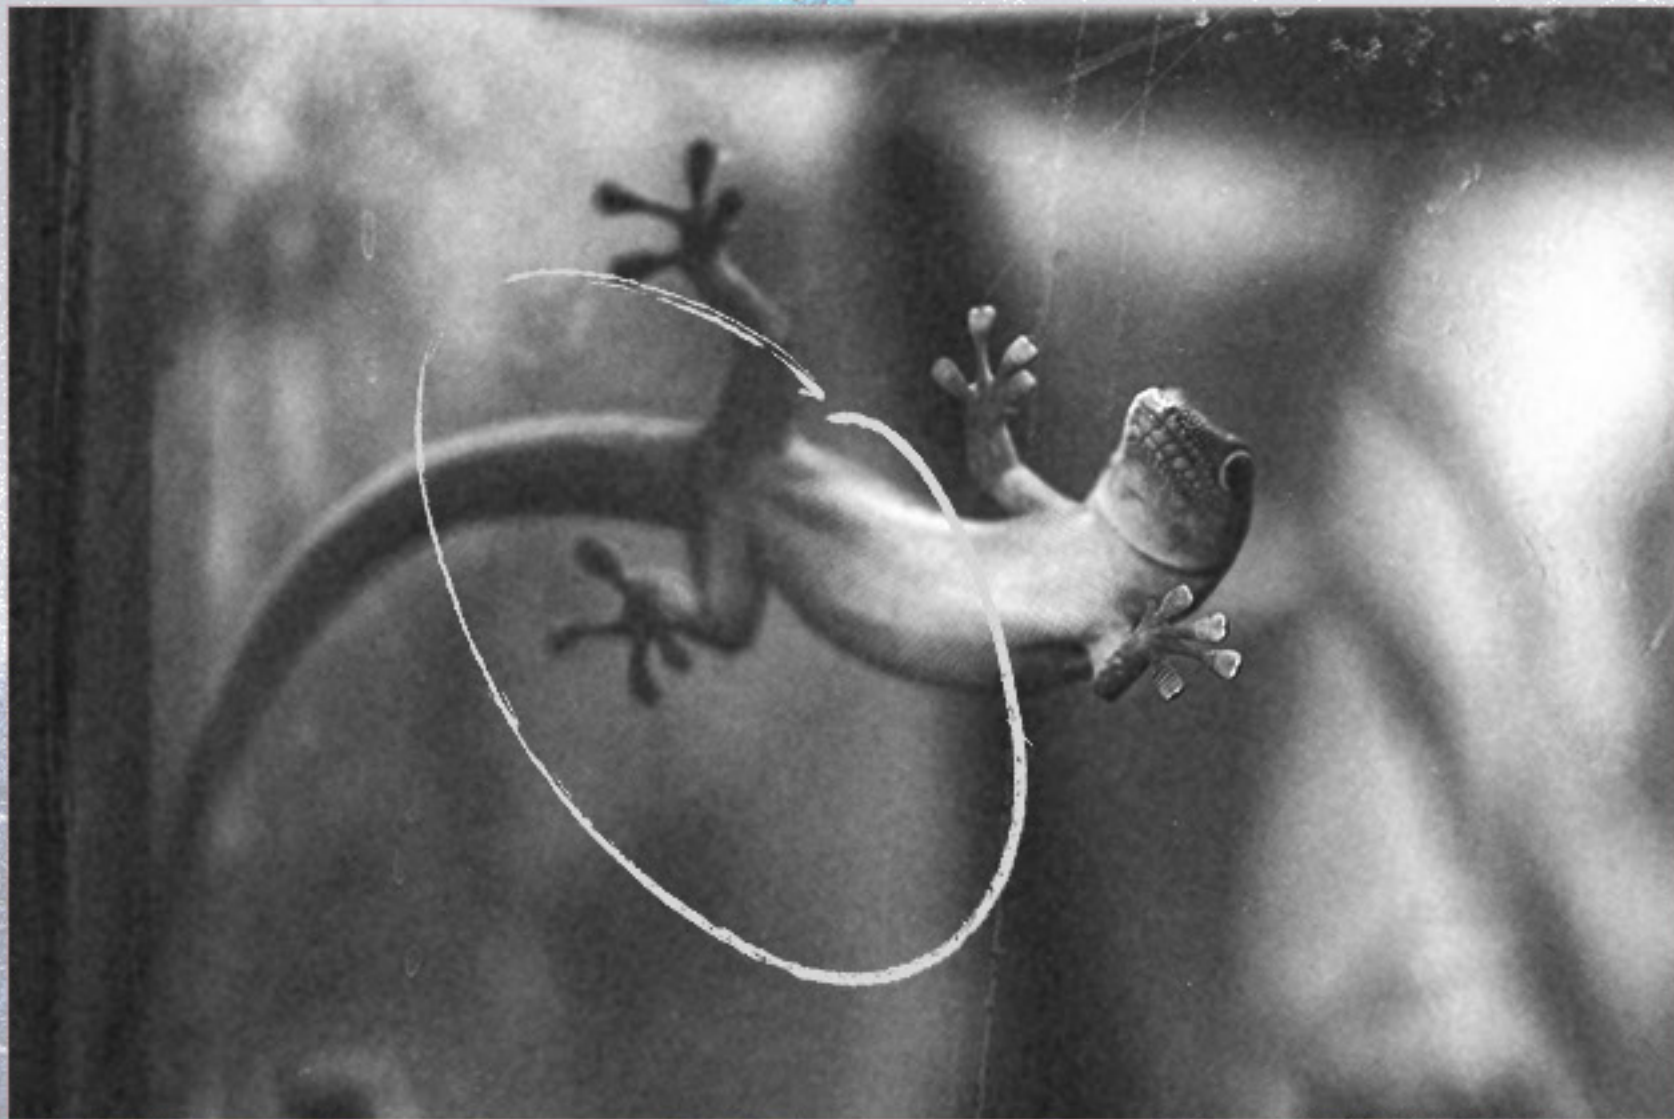

We classify our shoes by narrow, medium, and wide forefoot f i ts. The narrow shoes will also have a lower overall volume in the forefoot and heel and the wider shoes will typically have a higher volume in the forefoot and instep.

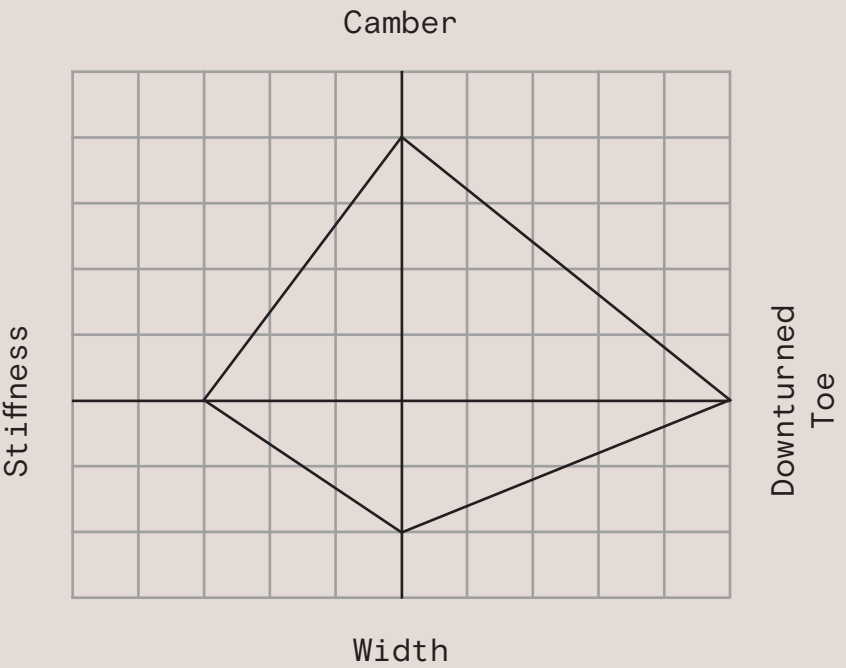

Climbing Shoes

EVOLAB

Our most progressive climbing shoes, the Evo Lab collection is designed for unlocking climbing's most challenging sequences.

Phantom

- BEST USE
- Bouldering on all types of rock
 - Gym Climbing on modern features
 - Steep single pitch routes

The Phantom was designed for the technical climber who needs equal sensitivity and power from their climbing shoe. The vegan synthetic upper built on an aggressively profiled last will ensure your foot is always in a power position and that the shoe will not stretch too much over time. The phantom features two midsoles that act in unison. The first midsole is the AVT (abridged variable thickness) midsole, which is an abridged variable thickness plastic midsole that is thicker in the forefoot and thins out to the edges of your toes to provide power and sensitivity. The AVT midsole is cut out under your big toe which increases sensitivity and helps find those delicate foot placements. The second midsole is the TPS+ (tension power system plus) which is a rubber midsole that is tensioned and bonded under your toes to always keep a little downturn in the shoe, even after it is broken in and also tensioned through the arch of your foot to eliminate dead space and provide a snug fit. The dark spine s(sensitive) heel midsole provides enough rigidity to help drive power through your foot to the toebox while remaining sensitive enough to feel small features. This shoe was designed with intent by Daniel Woods and tested rigorously in conjunction with Daniel Woods and Paul Robinson.

ITEM NO. 66-0000003645

Phantom–Low Volume

The Phantom low volume was designed for climbing the world’s most gymnastic problems and routes. It is for the climber who needs equal sensitivity and power from their climbing shoe. The shoe really begins to shine on steeper angles where toe and heel hooking are mandatory. The vegan synthetic upper built is on an aggressively profiled last to ensure your foot is always in a power position and that the shoe will not stretch too much over time. The Phantom features two midsoles that act in unison. The first midsole is a variable thickness plastic midsole. The second midsole is a rubber midsole, cut out under the big toe for increased sensitivity. The heel features evolv’s most sensitive midsole, called the Dark Spine and helps drive power through your foot to the toe box, while remaining sensitive enough to feel small features.

BEST USE

- Bouldering on all types of rock

ITEM NO. 66-0000062201

Zenist

BEST USE

- Bouldering on modern gym style, smeary problems that require powerful body positions and all parts of the shoe

The Zenist (M) was designed for the competition climber who needs the most feedback from their shoes during precise foot placements and delicate heel & toe hooks. The vegan synthetic upper built on an aggressively profiled last will ensure your foot is always in a power position and that the shoe will not stretch too much over time. The midsole featured in the Zenist is a rubber midsole that provides just the right amount of rigidity without sacrificing the sensitivity. When the competition is on the line feedback from your shoes can mean the difference between winning and competing.

MATERIALS

Zenist-Low Volume

BEST USE

- Bouldering on modern gym style, smeary problems that require powerful body positions and all parts of the shoe

The Zenist (W) was designed for the competition climber that has a lower volume and narrower foot and who needs the most feedback from their shoes during precise foot placements and delicate heel & toe hooks. The vegan synthetic upper built on an aggressively profiled last will ensure your foot is always in a power position and that the shoe will not stretch too much over time. The midsole featured in the Zenist is a rubber midsole that provides just the right amount of rigidity without sacrificing the sensitivity. When the competition is on the line feedback from your shoes can mean the difference between winning and competing.

Shaman

The Shaman is a modern cambered shoe designed for the climber who challenges themselves with different types of climbing. Equally home on overhanging gymnastic and steep routes that require precise footwork. The vegan synthetic upper built on an aggressively profiled last will ensure your foot is always in a power position and that the shoe will not stretch too much over time. Excelling on every angle and rock type, if there was one shoe to rule them all, it would be Shaman. The tensioned heel rand will provide enough power and support to bear down on small edges, while yielding enough to climb those off vertical angles. The love bump plastic midsole places your toes into a crimped power position, while the knuckle box provides room so you do not smash your toes against the top of the toe rand, these two features work in parallel to eliminates dead space under your toes and creates a comfortable and powerful sensation out of the box.

ITEM NO. 66-0000062204

Shaman Lace

The Shaman lace was designed for the climber that has one thing in mind: edging power. The structure of the vegan synthetic upper and stiff heel rand forces your toes forward into a power position creating a shoe that begs to stand on small features on a steep face. The love bump midsole places your toes into a crimped power position, while the knuckle box provides room, so you do not smash your toes against the top of the toe rand, these two features work in parallel to eliminates dead space under your toes and creates a comfortable and powerful sensation out of the box. The asymmetric lacing system provides a custom fit for a wide variety of foot shapes.

BEST USE

- Bouldering on all types of rock
- Micro edging on overhung terrain
- Steep single pitch routes

Climbing Shoes Performance

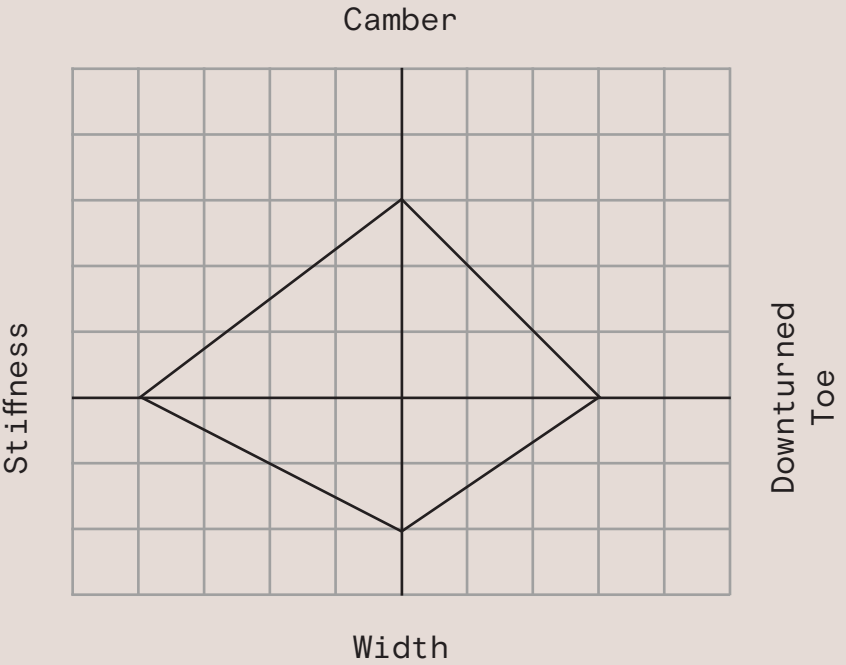

Choose your instrument. Whether your canvas is pocketed limestone, alpine granite or desert sandstone, our Performance collection delivers the confidence to draw your own lines on the wall.

Geshido

The Geshido was designed for the climber that needs to excel on all types of terrain from moderately overhanging, to vertical, to off-vertical faces for long periods of time. The Geshido is built with a single layer vegan synthetic upper, a synthetic upper will undergo less stretch than a leather upper, which will, in turn, keep the shoe feeling tighter and more powerful. The Geshido has a 2 strap hook and loop closure system for easy on and off. Equipped with a 1.2 full-length plastic midsole that will ensure that you have enough power to drive through small features and provide confidence during those technical sequences. The Geshido has a thinner heel rand to yield when the route goes past vertical but is paired with a dark spine heel midsole to ensure that there is plenty of rigidity and power to the toes when needed.

- BEST USE
- Hard single pitch vertical to moderately overhanging
 - Multi pitch technical routes
 - Gym climbing of all types

MATERIALS

Rave

- BEST USE
- Bouldering on all types of rock
 - Gym climbing of all types

The Rave designed for the specialist climber and has just the right amount of everything built into a comfortable and performance-oriented slipper, we reimagined what the potential of a slipper could be. Featuring a soft moderately tensioned heel rand that will keep your foot in the shoe and yield for those off vertical faces, a 1mm plastic midsole that has built-in arch wings to support and eliminate dead space in the arch and provide a sensitive and moderately stiff edging platform. Built with premium unlined leather, the rave will be the last slipper you ever purchase.

Climbing Shoes All-Around

Leave 'em on. We design our All-Around collection to balance all-day comfort with on-route performance when you're linking pitches or sessioning problems in the gym.

Kronos

BEST USE

- Slab to moderately overhanging
- All sized cracks, moderate edges and smears
- All day, multipitch

The Kronos was designed for the climber to excel on vertical and off-vertical faces. The low tension heel rand paired with a single layer vegan synthetic upper ensures that the shoe will be comfortable out of the box, but will not stretch too much over time. The 1mm full-length plastic midsole, and asymmetric toe profile, gives you the sensitivity to find features on slabs and enough rigidity to power down edges on vertical faces. The Kronos begs to be climbed all day, whether it is at the crag or training in the gym.

MATERIALS

- Liner: Unlined
Midsole: 1.2mm Full Length
Outsole: 4.2mm TRAX® SAS
Profile: Asymmetric
Rand: VTR (Thicker Front Toe Area)
Upper: Synthetic (SYNTHRATEK VX)
Vegan: Yes
Weight: 9.3oz per shoe (SIZE 9 US MEN’S)

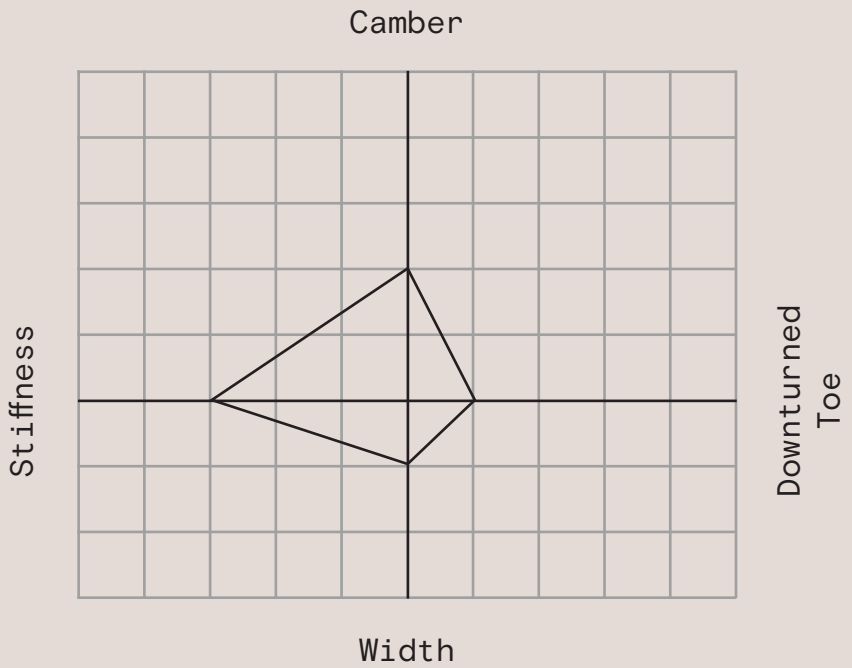

SIZES

- US MEN’S: 4 - 13.5 (INCLUDING HALF SIZES)
US WOMEN’S: 5 - 14.5 (INCLUDING HALF SIZES)

UK: 3 - 12.5
EUR: 35.5 - 48
MM(ASIA): 220 - 315

ITEM NO. 66-0000002475

Kira

- BEST USE
- Slab to moderately overhanging
 - All sized cracks, moderate edges and smears
 - All day, multipitch

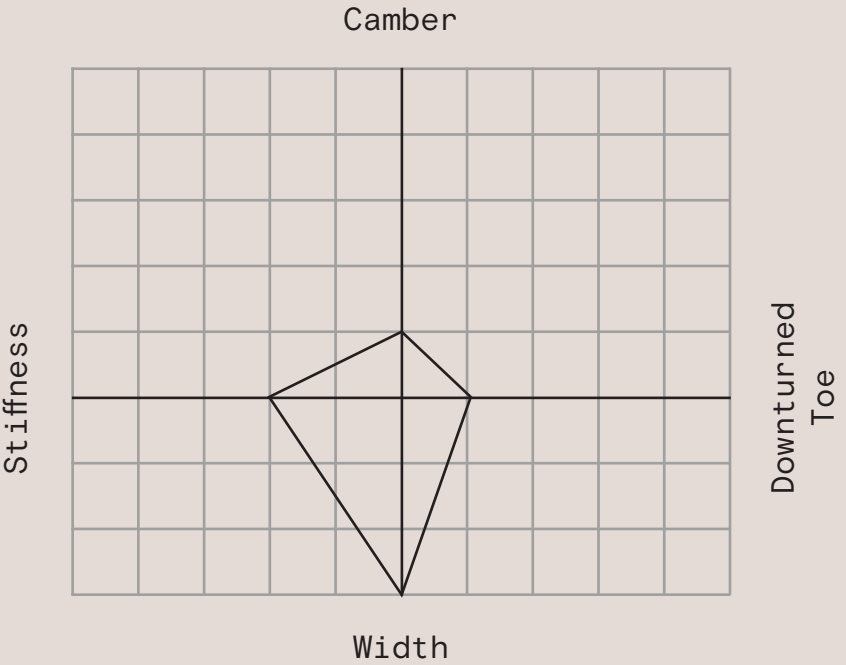

The Kira was designed for the climber that has a lower volume and narrower foot and built to excel on vertical and off-vertical faces. The low tension heel rand paired with a single layer vegan synthetic upper ensures that the shoe will be comfortable out of the box, but not stretch too much. The 1mm full length plastic midsole, and asymmetric toe profile, gives you the sensitivity to find features on slabs and enough rigidity to power down edges on vertical faces. The Kira begs to be climbed all day, whether it is at the crag or training in the gym.

MATERIALS		SIZES

Vegan:	Yes		
Weight:	6.8oz per shoe (SIZE 7 US WOMEN’S)	ITEM NO. 66-0000002485	

Defy

The Defy was designed for the climber that wants a comfortable fit and a modest amount of performance. The single later vegan synthetic upper is perforated to ensure breathability and keep the shoe tight over time. The 1 mm full-length midsole paired with a slightly asymmetric toe profile will give you a sturdy enough platform to edge on vertical faces or provide enough confidence for your off vertical endeavors.

BEST USE
Moderate steepness with small to large holds on all types of rock

MATERIALS

Liner: Unlined

Elektra

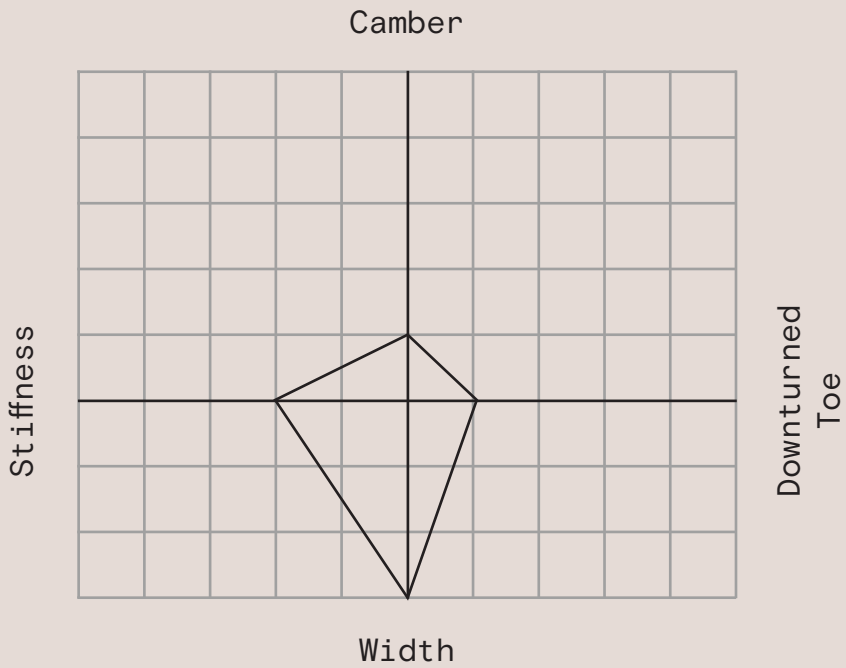

BEST USE
Moderate steepness with small to large holds on all types of rock

The Elektra was designed for the climber that has a lower volume and narrower foot with comfort and wants a comfortable fit and a modest amount of performance. The single later vegan synthetic upper is perforated to ensure breathability and keep the shoe tight over time. The 1 mm full-length midsole paired with a slightly asymmetric toe profile will give you a sturdy enough platform to edge on or provide enough confidence for your off vertical endeavors.

MATERIALS		SIZES

Vegan:	Yes		
Weight:	6.8oz per shoe (SIZE 7 US WOMEN’S)	ITEM NO. 66-0000000065	

Defy Lace

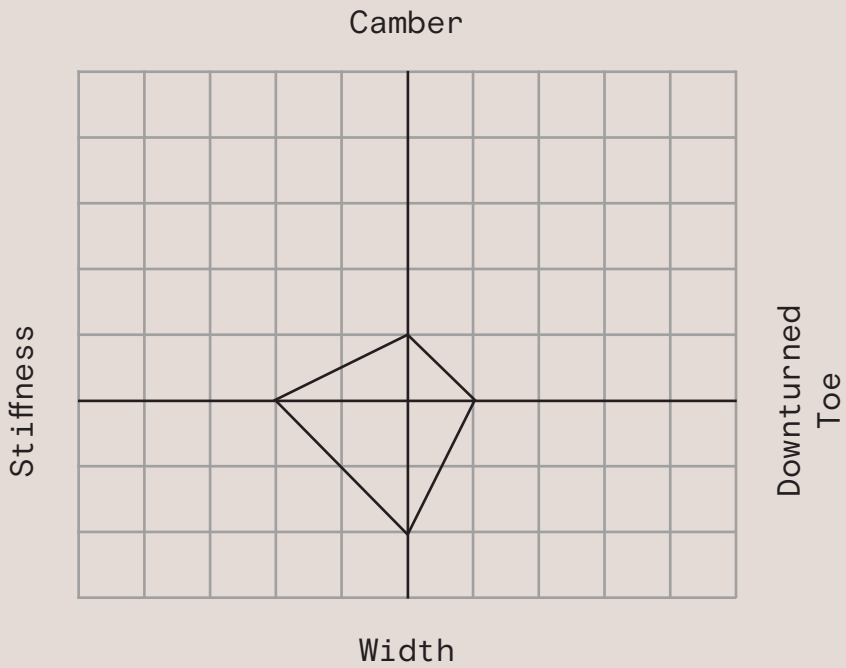

BEST USE

Moderate steepness with small to large holds on all types of rock

The Defy Lace was designed for the climber that has comfort and all-around moderate performance in mind. The single layer leather, that features a semi perforated upper, allows the shoe to melt and mold to your foot giving that custom fit while ensuring that the shoe does not lose structure; the perforations do not penetrate the upper. The $\frac{3}{4}$ length speed lace closure will ensure that you can sinch the shoe up quickly when you need to add a little more performance and drive some extra power to your toes. The 1.2 mm full-length midsole paired with a slightly asymmetric toe profile will give you a sturdy enough platform to edge on vertical faces or provide enough confidence for your off vertical endeavors.

Venga

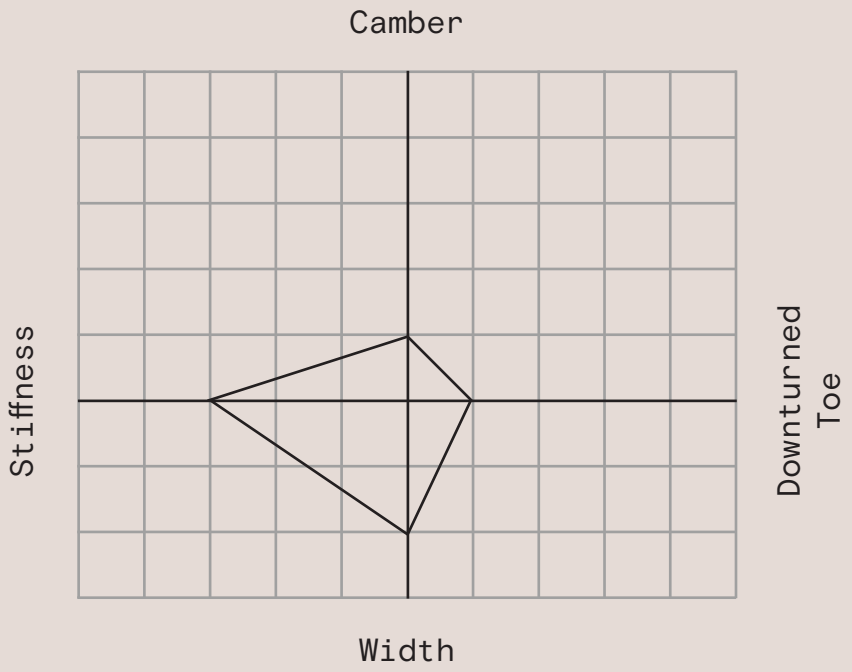

BEST USE
Medium and larger size and shape holds and features, in the gym and outside where comfort equal fun.

The Venga was designed for the youth crushers. The breathable vegan polyester upper ensures that the upper will accommodate many foot shapes. The Venga built on a slightly asymmetric, youth low volume last and the closure system is adjustable with a double D-ring to accommodate a growing foot.

MATERIALS		SIZES	
Liner:	Unlined	US YOUTH:	11,12,13,1,2,3,4,5

ITEM NO. 66-0000000745

Titan Non-Marking

BEST USE
Medium and larger size and shape holds and features, in the gym and outside where comfort equal fun.

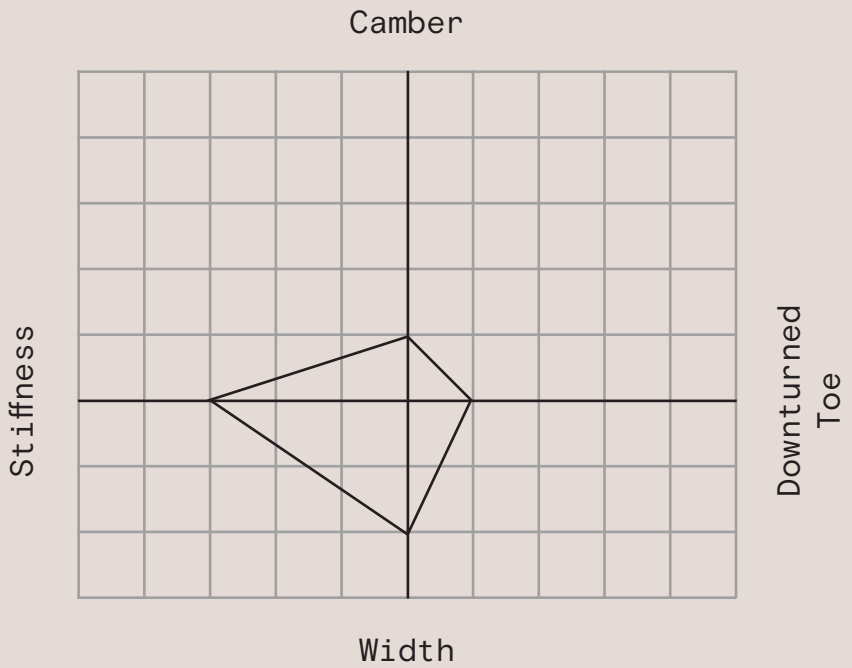

The ultimate rental and guide program shoe, and the most durable strap rental shoe on the market. A comfortable, symmetrical toe profile, leather upper, and strap closure make it ideal for gyms. The non-marking grey outsole version is made with TRAX® Enduro, a non-marking, more durable rubber and keeps your walls looking good!

- MATERIALS**

ITEM NO. 66-0000002885

Titan Non-Marking Junior

BEST USE
Medium and larger size and shape holds and features, in the gym and outside where comfort equal fun.

Built on a youth-specific last, this rental shoe for kids is the perfect complement to our Titan Non-marking rental shoe. Featuring a comfortable synthetic upper, a single strap for easy accessibility, and the size marker on the heel pull tab, the Titan Jr. is the best youth rental shoe on the market.

MATERIALS		SIZES

Climbing Essentials

From crashpads to chalk bags, hangboards to gear bags, here's everything you need that isn't shoes.

evolv

DESIGNED IN
CALIFORNIA
SINCE 2003

Drop Pad- 2 print options

OPT 1: SKULL
COLOR CODE: 597

OPT 2: JOSHUA TREE
COLOR CODE: 2881

Adjustable and contoured backpack straps, larger and more cushioned waistband to keep pad/gear weight on hips, a sternum strap to keep shoulder straps in place, and load lifters to redistribute weight off shoulders and onto hips. New quick-release industrial strength metal cam style buckles all around for easy open and close. Huge carpet square to clean shoes. A combination of metal cam style buckles, webbing, and flaps to secure your gear and, or, another pad. Easy access handles to move pads quickly from boulder to boulder without closing the pad. 3” open cell foam sandwiched between a 1” layer on top and bottom.

SIZES

OPEN: 48”x 36”x 5” (122cm x 91cm x 12.7cm)
CLOSED: 24”x 36”x 11” (61cm x 91cm x 28cm)

MATERIALS

900d Poly and water repellent coated fabric

ITEM NO. 66-0000092105

Drop Pad-Skull Print Specs

Metal Cam Buckles

Shoe Cleaning Carpet

HINGE LOCK SYSTEM WITH HOOK AND LOOP

CAP Pad

BACK PRINT DETAIL

Our LZ (landing zone) for cost conscious climbers. A “No Frills” pad with maximum performance. Modeled on our standard setting drop pad. The Cap features a super beefy 5” thick 3-layer foam construction with a confidence inspiring 45” by 54” landing area. No carpet square for foot tidiness and a minimalist carry system that says, “I’m here to pull”. The Cap is focused where it matters most, making sure you and the ground never get too close. Comes in any color you like as long as it is black.

Basic Training Board (Short)

HOLDS (TOP TO BOTTOM)

← Jug Rounded

← 20mm rounded edge

← 15mm rounded edge

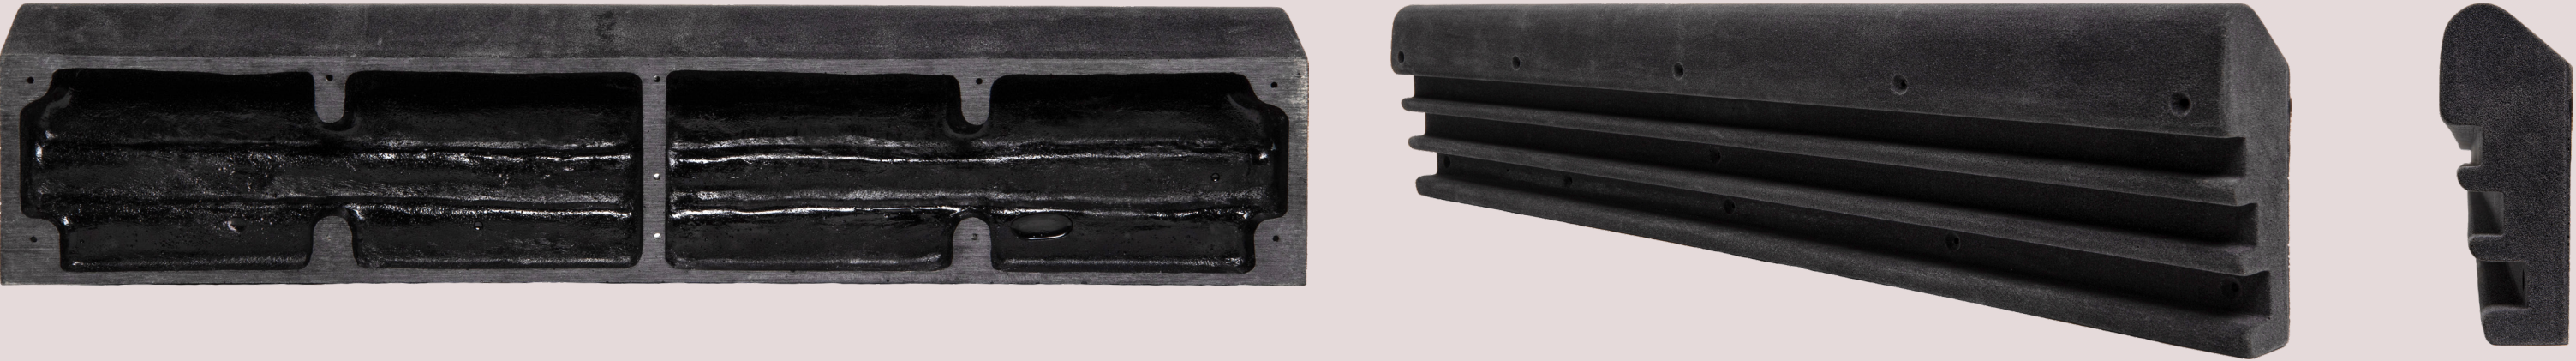

← 10mm rounded edge

SIZES Width: 24" (58.42cm)
 Height: 6.5" (16.51cm)

MATERIALS Resin

Still one of the most effective and efficient tools to increase contact strength and up your grade. If St. Exupery were a climber this would be his hang board. The Basic is deceptively simple in design but insanely versatile and easy to use. It's not cluttered with a bunch of rarely used tendon snappers. Suitable for climbers at any level of fitness. Designed in collaboration with our friends at Kilter and made near their studio in Colorado, our Basic Training Board is the perfect combination of beautiful design, hold shape and buttery smooth but grippy texture. Suitable for all abilities.

Liquid Chalk (250mL)

Liquid Chalk stripped of all fillers, no rosin, or other additives, 80% Ethanol + Magnesium Carbonate + water; guaranteed to keep your hands dry and sanitized. 80% alcohol concentration meets the standard amount of alcohol concentration recommended by the CDC, FDA, and WHO for Alcohol-Based Hand Sanitizer Products.

SIZE	250 mL
ITEM NO.	66-0000012120

Chalk Ball

ITEM NO. 66-0000012105
SIZE: 2oz (56g)

Unadulterated Pure Magnesium Carbonate guaranteed to keep your hands dry with no added fillers, driers, or smellers. Each bag will be a blend of chunky, fine, and everything in between, exact consistency may vary from package to package, but we can guarantee it’ll make your hands dry.

Loose Chalk

ITEM NO. 66-0000012113
SIZE: 10.6oz (300g)

Unadulterated Pure Magnesium Carbonate guaranteed to keep your hands dry with no added fillers, driers, or smellers. Each bag will be a blend of chunky, fine, and everything in between, exact consistency may vary from package to package, but we can guarantee it’ll make your hands dry.

Chalk Growler

The perfect tool for the shameless chalk moocher...or anybody that embraces the mantra that Reusable is the new Disposable. Let’s you buy your favorite chalk(s) in bulk and blend into just the right combination for ultimate sending power. You will be a step ahead when your local brew pub, gym or climbing shop starts selling chalk on tap.

SIZE	1.0L (1kg) Capacity
MATERIALS	Nylon 210 high density rip stop

Evolv’s Magic Climbing Tape

Finger Tapes

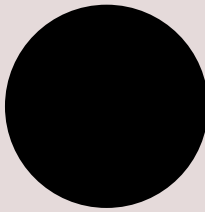

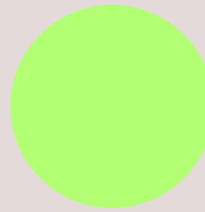

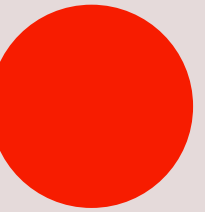

Hand Tape

Medical grade, self-adherent tape that is water resistant and breathable. Unlike other adhesive sports tapes, our magic finger & hand tape sticks to itself rather than the skin with gentle pressure application. Perspiration and water will not loosen the cohesive bond and the porosity permits air circulation. You can snip the tape away easily and cleanly without leaving any sticky residue and uncomfortable pulling of skin or hair.

AVAILABLE COLORS FOR HAND & FINGER TAPE*

COLOR CODES:	900	3310	8990	450	2180	8060	160	240

Street Shoe Sizing

Sizing Model

Our sizing is based on U.S. based street shoe sizing. We have specific sizing suggestions regarding fit in the description for each shoe.

Gender

Our performance and casual footwear is made to be unisex—you’ll see our Street Shoes list both men’s and women’s sizes on all models—although the fits can be different. We have put a description of fit on each shoe to help you with your buying decision.

Contact

If you have any questions at all, please reach out by phone or email. We are excited to help you find the perfect fit!

Street Shoes Rebel

The Rebel is the ultimate performance lifestyle shoe that has the styling of a modern lifestyle shoe with the performance and structure of an outdoor shoe for the climber in us. This shoe rebels against the boring looking old-school technical shoes and also against the pure lifestyle shoes which are not durable or technical enough for outdoor and urban adventures. It has a lightweight feel and water repellant upper, a cushioned midsole coupled with a technical outsole with rubber toe cap for durability and heel side reinforcement for stability. These shoes will comfortably take you from school or work to the gym, to the cliffs, to the cobblestone streets of Europe, and to the after parties. They might even come in handy when you have to parkour up a building to save a kitten in trouble.

Street Shoes Psyche

Built on the styling of the Cruiser Classic, the Cruiser Psyche steps up the performance giving more support and structure throughout. The higher volume performance lifestyle last has a wider fit in the toe box and gives more support and balance to the heel. The Trax® Enduro outsole gives the friction and durability to take you from school to work and on to the cliffs and mountains. Look great, go anywhere.
