[www.blauer-engel.de/uz195](http://www.blauer-engel.de/uz195)

Dieses Druckerzeugnis ist mit dem  
Blauen Engel ausgezeichnet.

The Blue Angel is the ecolabel of the federal government of Germany since 1978. Products and services that have been awarded the Blue Angel ecolabel are more environmentally-friendly than other comparable, standard products and services. The requirements set by the Blue Angel place a particular focus on examining the impact that products and services have on the environment: on the climate, resources, water, soil and air. These tests also focus on their impact on people.

We offset CO<sub>2</sub> emissions of our workbooks with certified climate-protection projects. To that end, all CO<sub>2</sub> emission sources are measured. That includes paper pulp, paper production, as well as printing plates and ink that are used for printing. CO<sub>2</sub> emissions that are created in printing are offset by certified climate-protection projects in other areas. Every order entered has an individual tracking number that is integrated into the upper logo. With this ID, the climate neutrality of the printed product from the point of ordering to the offset with CO<sub>2</sub> can be traced.

(bluesign® approved)  
Lining: 100% recycled PL

# GOING CIRCULAR

## LESS

- Waste
- Raw material use
- CO<sub>2</sub> emissions
- Water use

We put significant emphasis on improved design and increased durability to reduce our environmental footprint. An intelligent closed-loop economy rather than a throwaway mentality.

One of the most important steps in reducing the footprint of the outdoor industry is the move away from linear "Take-Make-Waste" thinking to a closed-loop model. This means that we will increase the efficiency of our production, extend the durability of our products, and reuse materials for as long as it is possible.

We have a long way to go, but we know we are on the right course. And we will put all of our energy into this, every single day.

## MORE

### MEZZALAMA POLARTEC® ALPHA® JACKET M/W

Main Material: 100% PA (bluesign® approved)  
 Filling: Min. 59% recycled PL, 41% PL (bluesign® approved)  
 Lining: 100% recycled PL

M 71596 - P. 16  
 W 71597 - P. 16

We design functional clothing and technical equipment for those passionate about alpine sports, and regard it as our obligation to produce these products as responsibly as possible.

## TAKING STEPS IN THE RIGHT DIRECTION

### RECYCLING

We are continually increasing the percentage of recycled material in our apparel styles, resulting in savings in raw materials, water and CO<sub>2</sub>. All technical shirts, with the exception of the s-tech shirts, comprise of at least 55% recycled material. 25% of the winter collection comprises of material that is at least 50% recycled. The poly bags we use in our packaging are 100% recycled.

### UPCYCLING

Material off-cuts are upcycled into high quality accessories, for instance the Upcycled Thermal Gloves 71369 - page 143.

### MAINTENANCE AND REPAIR

We offer repair options and spare parts for many products. Our guiding principle: mending is better than ending.

### PACKAGING

Our hangtags are made of recycled paper, attached by cotton cord rather than plastic. Using a new folding technique for our t-shirts reduces the size of poly bag by 50% resulting in less trash. Inside the ski touring boots there is no more packaging any more.

### CARRY-OVER

Many styles remain in our lineup through several collections, allowing you to mix and match old and new.

### DURABILITY

We regard high quality and product durability as essential. On our bindings, touring ski boots and eyewear we offer a LIFETIME GUARANTEE. All other DYNAFIT products can be registered on our website to extend their guarantee to 3 instead of 2 years.

## 71600 MEZZALAMA POLARTEC® ALPHA® OVERSHORTS M

NEW

## FEATURES

- Articulated Knees
- Stow Pocket
- Elastic Waist
- Adjustable Waist
- Elastic Hem
- Full Side Zip
- Reflective Print

## MATERIALS

Main Material: 100% PA

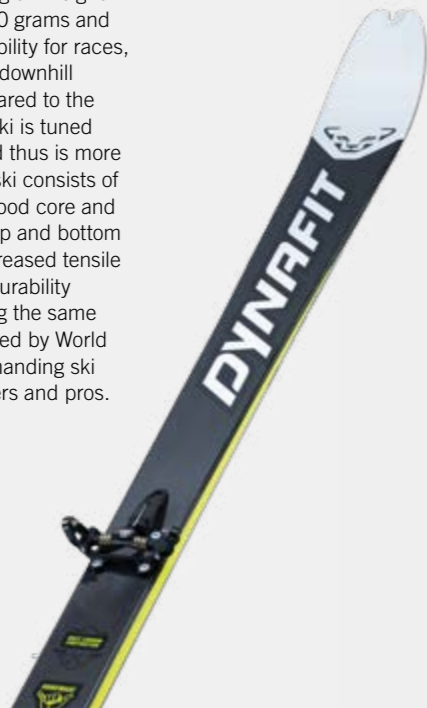

# DNA SYSTEM

DNA, the name of the new collection, stands for the unmistakable tie between the DYNAFIT brand and racing. Speed and lightness are embodied in the brand's DNA. With this new collection, DYNAFIT is launching technical, weight-optimized products to achieve personal bests on the international skimo race scene. DNA - The Fastest Race System.

## DNA SKI

49705\_6606

The new DNA touring ski weighs in at an ultralight 690 grams and has impressive durability for races, lending outstanding downhill performance. Compared to the DNA Pro, the DNA ski is tuned somewhat softer and thus is more forgiving. The DNA ski consists of a Paulownia Race wood core and a UD carbon fiber top and bottom layer. This offers increased tensile strength and more durability while still maintaining the same low density. Developed by World Cup athletes for demanding ski mountaineering racers and pros.

## DNA BOOT

61912\_9269

Its 810 grams, a shell construction of carbon fiber and the innovative Twistfit closure system combine for intuitive, reliable handling: The DNA ski touring boot is geared toward pro racing athletes and ambitious ski touring athletes to whom not only every gram counts, but also reliability when racing.

## DNA POLARTEC® ALPHA® JACKET

M 71594\_0911  
W 71595\_0911

## + DNA POLARTEC® ALPHA® PANTS

UNI 71603\_0911

Extra protection from wind and cold: The DNA Polartec® Alpha® jacket and pants can be worn over race clothing as an outer layer, lending you comfortable warmth with good breathability. The reflective print ensures better visibility at twilight. One featured highlight of the jacket and pants are the magnetic ends on the zipper that it can be closed rapidly and easily, even with gloves on.

The pants are equipped with two full-length zippers, meaning they can be pulled on over the race suit in seconds.

## DNA CRAMPON

48274\_2471

Developed for high-performance ski mountaineering: With the new DNA crampon, DYNAFIT is launching the lightest racing crampon on the market. This DNA crampon at light 295 grams is made completely of aluminum. The crampon's adjustment system, patent pending by DYNAFIT, allows athletes super easy, fast adjustments without the need for extra tools. The DNA crampon attaches quickly to ski touring boots and, after use, just folds together compactly in seconds to stow in a pack.

## DNA BINDING

49169\_9180

Low weight combined with the highest durability – that is precisely what is essential for skimo athletes to dominate in international races. Thanks to optimized bionic design and a combination of milled aluminum and carbon fiber materials, the DNA binding weighs in at an ultralight 96 grams. On the descent, the binding wins you over with strong performance and excellent power transfer to the ski. The DNA binding also offers impressively good ergonomics and intuitive handling in transitions. The binding also has a version with brakes – the DNA+ is our ultralight ISMF-compliant Race binding. A binding by athletes, for athletes. #speedup to new personal bests.

## 71384 DNA RACESUIT M

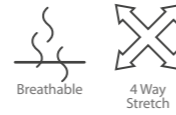

0521 nimbus

Weight: 547 g  
Size: S - XXL

Your second skin for racing. One-piece race suit with integrated cut-outs for the backpack hipbelt for free access to the skins pocket.

## FEATURES

### MEZZALAMA RACE PANTS

The Mezzalama Race Pants will win you over with its great breathability, 4-way stretch and close fit. It really is the perfect companion for training and in skimo races.

### TLT TOURING DYNASTRETCH PANTS

The TLT Touring Dynastretch Pants are a light and technical ski touring pants for fast, performance-oriented ski tourers. The Dynastretch™ fabric with 4-way stretch and an athletic cut enables huge freedom of movement for your Speed tours.

### NEW SPEED DYNASTRETCH PANTS

These light Speed Dynstretch Pants with their intelligent hybrid construction were developed specifically for on-piste ski touring. Made with a wind-resistant, stretch soft shell on the front side and a brushed stretch fabric on the back side, these pants are not only functional but also extremely comfortable. Ideal for challenging on-piste climbs.

### RADICAL GORE-TEX PANTS

The high-performance Radical GORE-TEX Hardshell Pants wins points with its lightness, huge durability, and great breathability. It is waterproof and thus keeps you dry in a heavy snowfall.

### RADICAL INFINIUM HYBRID PANTS

The Radical INFINIUM™ Hybrid Pants scores big as a breathable ski touring pant with an intelligent hybrid construction. The 3-layer GORE-TEX INFINIUM™ fabric is 100 % windproof, breathable, and water resistant. The Dynastretch fabric at the waist and hips and integrated at the back of the knees offers extra breathability. An all-rounder for classic ski touring.

### MERCURY DYNASTRETCH PANTS

These Mercury Dynastretch Pants are made of a very breathable and yet durable Dynastretch™ fabric and are wind- and water-resistant. These softshell pants offer huge freedom of movement and superior comfort with their brushed inner face.

# WINTER PANTS GUIDE

### FREE GORE-TEX PANTS

The Free GORE-TEX Pants are made for steep downhills in deep powder. They were specially developed for pow hounds who like to take on any challenge in harsh conditions. These waterproof pants offer ideal, all-round protection paired with a casual look.

### FREE INFINIUM HYBRID PANTS

The Free INFINIUM™ Hybrid Pants win points for great breathability and offer reliable protection from wind and weather on the front side and seat from the use of GORE-TEX INFINIUM™ fabric. Dynastretch fabric integrated into the waistband and at the back of the knees brings high breathability and ideal moisture management on high-intensity climbs.

### BEAST HYBRID PANTS

The Beast Hybrid Pants are optimally suited for backcountry tours with their intelligent mix of materials. The combination of waterproof protection from the Dynashell 3-layer fabric on exposed areas along with 2-layer Dynashell Windproof fabric in the hip area ensure great durability as well as high breathability.

# YOUNGSTAR

With our new Youngstar Collection, we have introduced to the market the very first ski touring system specially for kids and youth. The system consisting of hardware and an apparel collection is simple and intuitive in handling and use and thus particularly well-suited for the next generation.

YOUNGSTAR – Your Quality Family Time.

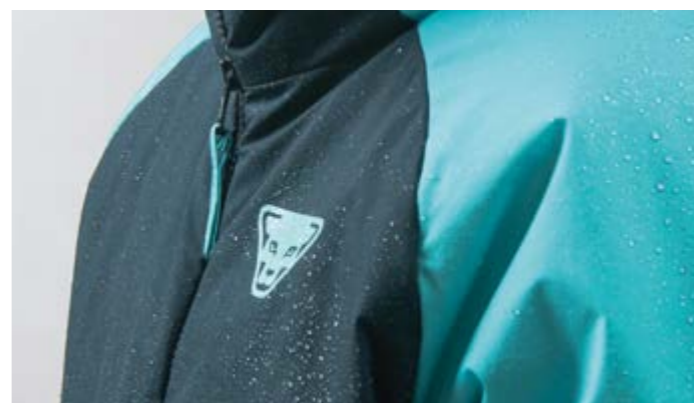

## YOUNGSTAR SKI SET 48497\_2010

With the Youngstar ski touring set, DYNAFIT is delivering a perfectly coordinated and pre-mounted setup including skis, bindings and skins. The Youngstar skis are light, forgiving, and feature simple handling, and are available down to a size of 120 cm.

Our Rotation 7 binding comes mounted on it with its patented pivoting toe piece – the only safety binding for kids and youth that is based on the superlight, time-tested Low-Tech System.

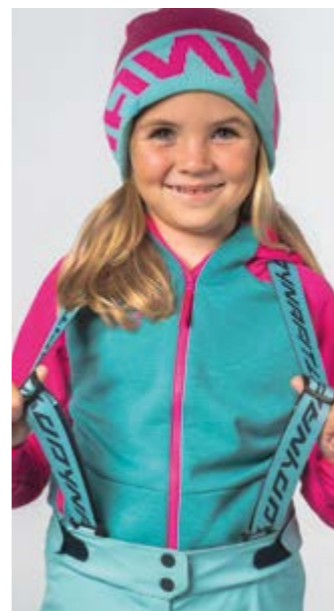

The binding can be operated with ease and quite intuitively. The release function is absolutely reliable which in the case of a fall is particularly essential. The Rotation 7 also offers a release value of 2.5 to 7, unique on the market today, and thus is well-suited for even very lightweight ski touring little ones.

The set is rounded out with the Speedskin Youngstar. Unpack & Ski.

## YOUNGSTAR INFINIUM™ INSULATION JACKET 71736\_8051

The new Youngstar INFINIUM™ Insulated jacket offers 2-in-1: With the use of GORE-TEX INFINIUM™ fabric with Wind-stopper Technology, the jacket is weather resistant and reliably protects youngsters from wind and light snow. Extra PrimaLoft® insulation also ensures cozy warmth even on colder days.

## YOUNGSTAR 3-LAYER PANT 71738\_8051

The new Youngstar 3-layer pants are very waterproof with a waterproof rating of 20,000 mm, keeping the next gen of ski touring enthusiasts dry even in heavy snowfall or when romping in the snow. A highlight of the softshell pants are the removable suspenders as well as the adjustability using hook-and-loop closure at the waist. This allows the size of the pants to be easily changed based on changing needs of kids and youth.

## YOUNGSTAR POLE 49454\_2090

The Youngstar Pole is the first ski touring pole developed by DYNAFIT just for children and youth. This adjustable aluminum pole can be quickly and easily adjusted in length from 85 to 115 cm, weighs 210 grams, and offers a cork grip for a comfortable feel in hand.

## YOUNGSTAR BOOT 61926\_6535

The Youngstar Boots are the first ski touring boots developed by DYNAFIT for kids and youth that has been designed just for the anatomy of the little ones' feet. Plus, they are available down to a size 21.5. These ski touring boots are easy and intuitive to use and enable a natural and particularly energy-saving walking motion at a sensationally low weight of 930 grams. On the descent, it offers kids' feet the necessary stability and support for fun and safety on-piste and in the backcountry.

# ESSENTIALS

Get the most out of your downdays! Spending active time in the mountains is our passion and source of energy. But sometimes our bodies need a break, conditions restrict us to go out or we just want to have a good day in the city. But being away from the mountains doesn't mean we can't live an active lifestyle. The 24/7 collection offers various stylish and functional products for each time of the day in an urban environment and reflects our passion for sports and outdoors.

Urban. Tech. Light.

# DYNAFIT ARTIST SERIES

## DYNAFIT X LAURIANE MIARA

French artist Lauriane Miara has developed extraordinary shirts with a powerful message as part of the DYNAFIT Artist Series: "Leave only ski traces." This is to direct attention to the importance of sustainability in the ski touring industry.

In doing so, a special feature is the three-part design, which spans across three motifs like a kind of puzzle, including uphill ski tracks, at the summit, and on the downhill.

The concept of sustainability is also reflected in the T-shirts' fabric in the Artist Series. This consists of 81 % recycled polyester, 14 % organic cotton and 5 % spandex.

„MOUNTAINS ARE WHERE I LIVE AND WHERE I FEEL GOOD, NO MATTER THE ALTITUDE. I DON'T SEE THEM AS A PLAYGROUND BUT AS AN ENVIRONMENT WHERE PEOPLE, ANIMALS AND PLANTS EVOLVE FREELY.”

LAURIANE MIARA

### TIGHT FIT - SLIM FIT

- Made of stretch fabrics
- Compression fit

These snug-fitting products optimize moisture management and temperature regulation.

### ATHLETIC FIT - BODY-CONSCIOUS FIT

- Anatomically tailored
- Great freedom of movement

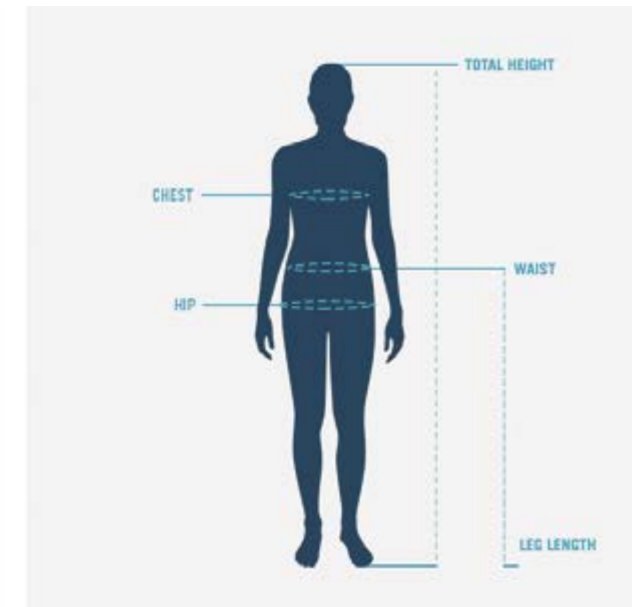

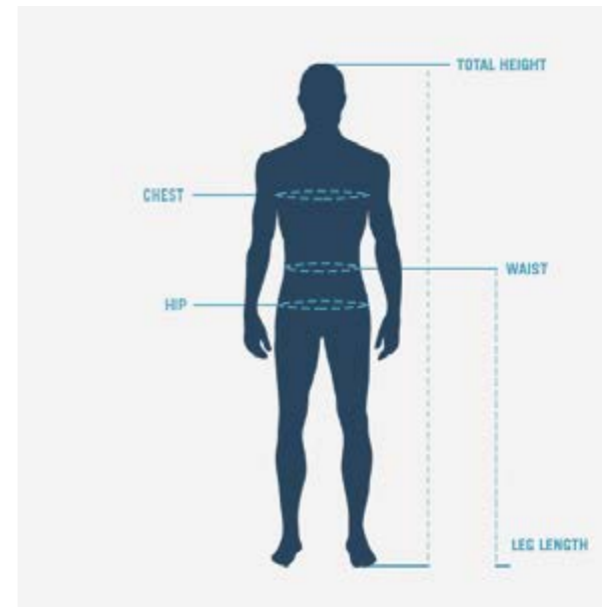

These body-conscious close-to-the-body pieces also work well when layering.

### SPORTIVE FIT - RELAXED FIT

- Anatomically tailored
- Maximum freedom of movement

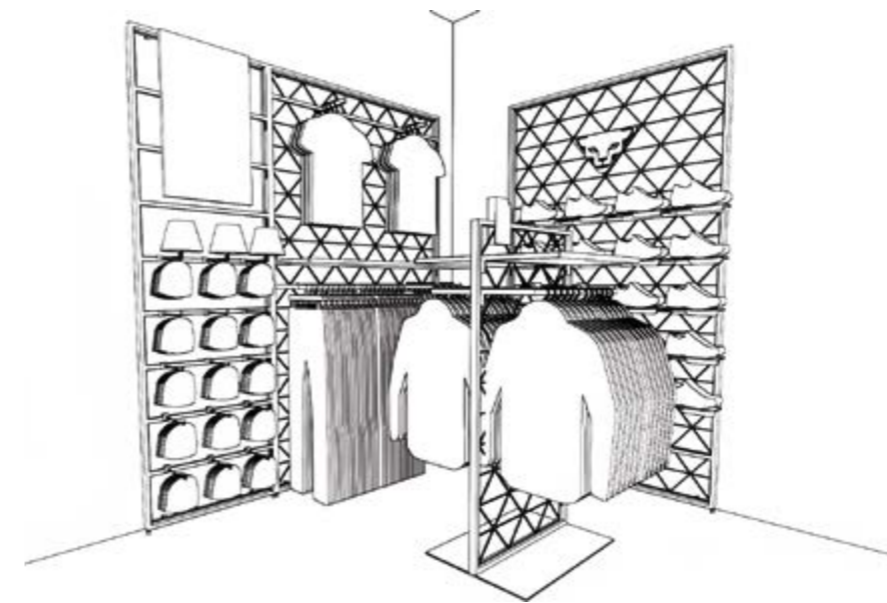

These loose-fitting products offer great comfort and when layering offer good seasonal versatility.

# CORPORATE SOCIAL RESPONSIBILITY

We see it as our duty to equip passionate mountain sport athletes with innovative, premium products for unforgettable experiences in the outdoors. In doing so, it is a given for us to also assume responsibility – certainly for the safety of the athletes, but also for protecting our environment and fellow human beings.

Corporate responsibility comprises not only sustainable business practices along the entire value chain but also equally transparent communication with all relevant stakeholders in order to continually learn and improve.

## ENSURING OUR MATERIALS AND PRODUCTS ARE SAFE FOR BOTH HUMANS AND ANIMALS, AND FOR THE ENVIRONMENT IS OUR TOP PRIORITY.

### FAIR WORKING CONDITIONS

The largest portion of our apparel is produced in Asia. The global centre of competence plus cutting and sewing expertise is located there, including some of the most efficient production partners. This means some of our factories are far away from us, making it harder for us to monitor each step of the process. Achieving fair working conditions in these factories means we have to pick the best partners and work with them to help them reach our high standards for working conditions.

All our suppliers have to sign and commit to our **CODE OF CONDUCT**, a document that sets the social and ethical standards to be respected in all facilities manufacturing our products.

### FAIR WEAR FOUNDATION

To ensure we are always putting the well-being of our associates first, we also partner with the most rigorous labour conditions expert in textiles that we know: Fair Wear Foundation. Fair Wear Foundation is an independent non-profit organisation with the mission to improve working conditions globally in the textile and apparel industries. We have been working with Fair Wear Foundation since 2013 to ensure the well-being of workers involved in the manufacturing of our textile products. FWF helps us monitor working conditions and audit our factories, it supports us in our relations with our suppliers, and it

ensures we are subject to an annual review. In 2017, the FWF first assigned us the leader status – a level only given to brands who are doing exceptionally well and operating at an advanced level. FWF raises the bar with its requirements every year, and we're continually being challenged to do more to satisfy these increased standards.

We're proud to say that in 2021 we've received the leader status for the fifth time in a row.

### CURRENTLY, 93% OF OUR TEXTILE PRODUCTION IS UNDER MONITORING FOR FAIR WORKING CONDITIONS

(the factories have either been audited by third party experts in workers' rights or are located in low-risk countries such as Italy and Germany).

Find out more about Fair Wear Foundation at [fairwear.org](https://www.fairwear.org).

### HIGHER CHEMICAL STANDARDS

One of our priorities is making top performance products that are safe for both humans and the environment. Our goal is to control the entire lifecycle of our products – from raw material, through the production process, to the finished product. Our products are manufactured according to the

**OBERALP CHEMICAL POLICY.** The document establishes a formal process to ban or limit the presence and use of hazardous substances in our products and production processes. It is even stricter than the legal limits and thus guarantees safety and compliance. Our chemical policy is a central part of the Conditions of Purchase with our suppliers, and it's mandatory at every stage of the production and distribution process.

### PROUD TO BE A bluesign® PARTNER

We also work with expert partners and third-party certifications, such as bluesign®. We have been bluesign® system partners since 2011 and today a large portion of the fabrics used in our products are certified. bluesign® seeks to eliminate hazardous substances starting at the first stage of the manufacturing process and guarantees a safe and clean supply chain for the environment and for everyone involved at every step. Additionally, we work with an external and independent chemical laboratory to conduct tests on our products every season to ensure they are meeting our strict internal standards.

### PFC-FREE DURABLE WATER REPELLENTS (DWR)

Perfluorocarbons (PFCs) are a type of chemical used to make products resistant to water, grease and stains. PFCs guarantee best-in-class performance for our technical apparel that needs to be both water-repellent and still allow humidity to exit. The problem with PFCs is that they are linked to negative health effects in humans, animals and nature. Both during the production and use phases, PFCs are released into the environment and are persistent. This means they degrade very slowly in nature and can also travel easily through water and wind. They then end up in our food chain. For this reason, since 2014 we have completely eliminated long-chain PFCs (C8) from all our products. All our water-repellent (DWR) products now either contain shorter-chain PFCs (C6) or are 100% PFC-free. We're continuously working to increase the number of PFC-free DWR treatments in our products.

For our most technical products to be used in extreme weather conditions, it is necessary to apply C6 DWR treatment to ensure full weather protection and warmth. We are continuously investing to further reduce the use of C6-chemicals in our fabrics and significantly increase the number of PFC-free products without compromising on user-safety performance. Please note that contamination from PFCs cannot be excluded.

# CORPORATE SOCIAL RESPONSIBILITY

HANDMADE IN EUROPE

## MADE IN EUROPE

55% OF ALL DYNAFIT PRODUCTS ARE MANUFACTURED IN THE ALPS.

As an innovator and developer of technical equipment and gear for mountain sports, it remains our biggest challenge to work sustainably. Social responsibility for people and nature is a given.

Fair working conditions, high quality standards, shorter transport distances – all of this saves resources and is our highest priority in our search for appropriate production facilities in Europe.

We are working constantly on shifting more production facilities to Europe. When it comes to bindings and ski touring boots, 100% of production occurs in Germany respectively in Italy; textiles are still in large part imported from Asia. However, we pay special attention here to ensure safe and fair working conditions in all our factories.

For more information on our sustainability work, read our latest sustainability report at [dynafit.com/sustainability](https://dynafit.com/sustainability).

PRODUCTION SITE	VALUE % (FOB)
Germany	22,5%
Italy	21,9%
Vietnam	20,0%
Bangladesh	11,3%
China	10,5%
Austria	5,6%
Lithuania	2,0%
Switzerland	1,7%
Tunisia	1,7%
Taiwan	1,1%
France	0,8%
Belarus	0,8%

## MADE WITH RECYCLED CONTENT

The styles marked with “made with recycled content” contain at least 50% recycled content in their main fabrics. The recycled polyester used in our collection is mostly made from post-consumer PET bottles. Existing plastic is melted down and spun into new polyester fiber, also known as rPET. This means we reduce our dependence on petroleum and we use “waste” as the raw material.

By using post-consumer recycled plastic to create our recycled fibers, we are also diverting plastic from ending up in landfills. Studies show that the production of recycled polyester saves more than 50% of CO<sub>2</sub> emissions and energy compared to virgin polyester, reducing the overall environmental impact of the product. Most of the shirts made of polyester are also recyclable, meaning their fabric can be fed back into the production cycle.

Recycled Content Highlight page 18

## RESPONSIBLE DOWN STANDARD – RDS

100 % of the down used for our products is certified based on the Responsible Down Standard (RDS). RDS is currently the most comprehensive independent certification standard for animal welfare and traceability for down globally. It guarantees that ducks and geese are treated well for their lifetimes. The certification standard examines and scrutinizes every step of the supply chain all the way down to animal farms.

RDS certified means:

- NO live plucking
- NO force feeding of ducks and geese
- NO slaughtering of animals just for down and feathers
- YES for a transparent supply chain

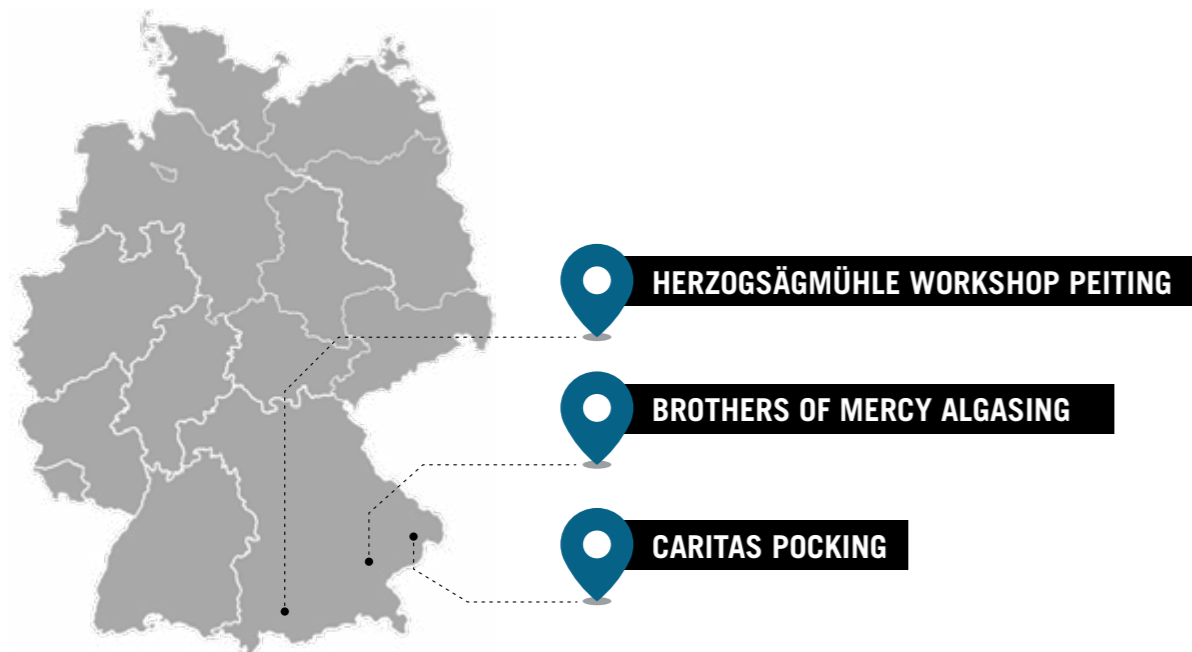

# SUPPORT OF EMPLOYEES WITH DISABILITIES

In today's society, a large part of daily life is all about work, which can be a satisfying and fulfilling experience.

Since 1999, DYNAFIT has maintained a partnership with Caritas. Caritas, a nonprofit organization, gives persons with disabilities the chance to find a place in the working world. It does this by creating an environment that is friendly for those with disabilities and thus is ideally suited to the needs of every single person. Caritas thus offers persons with disabilities the opportunity to experience independence, recognition and inclusion, all of which DYNAFIT would like to make possible for them.

**DYNAFIT WORKS TOGETHER WITH CARITAS ON A UNIQUE PROJECT: IN THREE FACILITIES IN GERMANY, EMPLOYEES WITH DISABILITIES MAKE OUR SKI BINDINGS. AT THE SAME TIME, EVERY BINDING IS ALSO TESTED IN OUR PERSONALLY DESIGNED TESTING FACILITIES.**

We are very proud to be able to say that our bindings are 100% assembled at these organizations by employees with disabilities.

# DYNAFIT AND THE SNOW LEOPARD

To DYNAFIT, the snow leopard is not only a brand symbol. Its characteristics and faculties are consistent with the values and characteristics of the company. For DYNAFIT, the snow leopard is the role model and symbol for all the characteristics and abilities that ensure a life and survival on the mountain.

**THE SNOW LEOPARD DAY HAS BEEN A FIXED DATE FOR OUR COMMUNITY FOR YEARS AND HAS BECOME AN ESSENTIAL PART OF OUR COMMITMENT TO WILDLIFE CONSERVATION.**

## SNOW LEOPARD TRUST

Unfortunately, the snow leopard is now in danger of extinction. Thus, DYNAFIT has set the goal of helping the snow leopard. In order for this to occur professionally and sustainably, we support the non-profit organization, Snow Leopard Trust, founded in 1981. Our most successful project in this regard is most certainly the "International Snow Leopard Day."

## INTERNATIONAL SNOW LEOPARD DAY

The International Snow Leopard Day has turned into a fixed date on the calendar of the ski touring community in recent years. Together, participants accumulate vertical meters for protection of the snow leopard. Each vertical meter achieved and tallied is transformed by DYNAFIT into one cent donated. In Winter 2021, due to the COVID-19 pandemic, the International Snow Leopard Day was not able to take place in usual format. Instead, more than 45 DYNAFIT athletes from 10 different countries headed out on a ski tour on March 16 in the name of the snow leopard to work hard collecting vertical meters. The result was more than **113,415 meters of vert covered**, which turned into a total of **EUR 11,341** (10 Cent / vertical meter), all of which was donated to the Snow Leopard Trust.

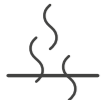

Peter Bolliger

## APPAREL

### ACTIVE AIRFLOW VENTILATION

Laser-perforated openings increase ventilation.

### BREATHABLE

Breathable performance fabric.

### MAGNETIC ZIPPER

Zipper with magnetic ends for fast, easy zipping, even when wearing gloves.

### PACKABLE

Product packs small.

### QUICK DRY

Extra quick-drying performance fabric.

### WATERPROOF

Performance fabric with a waterproof membrane and sealed seams.

### WATER-REPELLENT

Performance fabric with water repellency.

### WINDPROOF

Performance fabric with a windproof membrane.

### WIND-RESISTANT

A tightly woven fabric keeps out most wind and at the same time enables good ventilation.

### 4-WAY-STRETCH

Performance fabric with 4-way stretch for great freedom of movement.

## CSR

### PFC-FREE

PFC free durable water repellent finishing.

### MADE WITH RECYCLED CONTENT

Styles containing at least 50% recycled content in their main fabric.

HANDMADE  
IN EUROPE

### MADE IN EUROPE

Produced in Europe.

### RDS

Independent certification of 100% responsibly sourced down.

### ORGANIC COTTON

Cotton from certified organic farms that do not use pesticides or synthetic fertilizers.

### UPCYCLED PRODUCT

Product made from discarded materials.

# B2B PORTAL

## DYNAFIT AT YOUR FINGERTIPS

Our B2B portal is an online shop for business customers. In comparison to email or faxed orders, the platform offers an overview of real-time availability because the system is connected to our inventory management system and is updated daily. Every retailer who has been given access by us can place orders around the clock and can download marketing materials such as images, videos, workbooks, and much more. Website: [serviceportal.oberalp.biz](http://serviceportal.oberalp.biz)

## WHY YOU SHOULD USE OUR B2B PORTAL

- Ability to order any time of the day or night, regardless of our office hours
- Deliveries FOB without any minimums
- Simple overview of available sizes and colours
- Easy, timely, and quick processing – without the need to hold on a call
- Opportunity to print or electronically archive all orders
- Downloading of images, product descriptions, price lists, catalogues (PDF format), and videos
- Ability to track shipments of orders placed
- Overview of all orders, whether placed on the B2B portal or elsewhere

## HOW TO REGISTER FOR THE B2B PORTAL

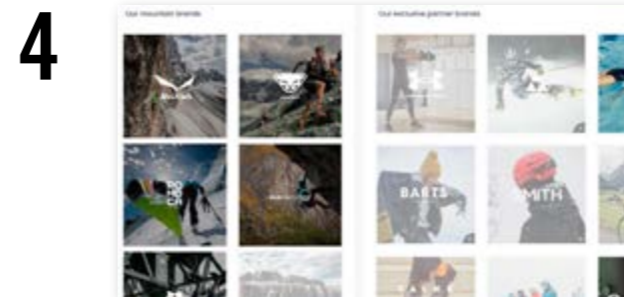

**1** Open a web browser to our home page [dynafit.com](http://dynafit.com). In the footer area, on the right side, select “B2B / PRESS PORTAL”, or input the web address [serviceportal.oberalp.biz](http://serviceportal.oberalp.biz) into your browser.

**2** Fill out the new customer registration form with all the necessary information. Within 24 hours, you will receive your login details for access.

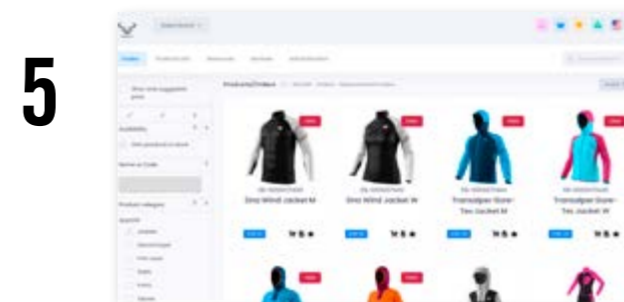

**3**

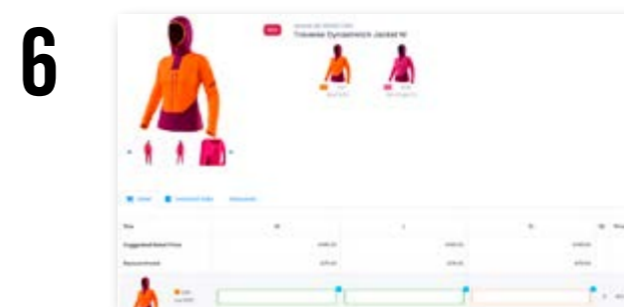

At [serviceportal.oberalp.biz](http://serviceportal.oberalp.biz), a dialogue box will appear to request your login details. Input your user name and password. Click on “Log in”.

In the B2B portal, we offer all products of the OBERALP Group available for each country. First, choose the collection from which you want to order by clicking on the brand. You can select any collection for which you have access.

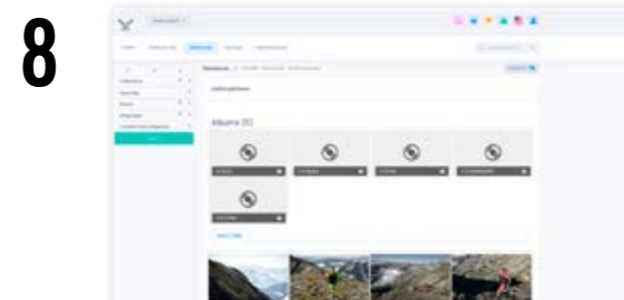

You are able to search for products by clicking on “Order” in the “Products/Orders” section and then inputting the product name (a part of the name is usually sufficient) or the product number. Click on “Search” to show all relevant search results.

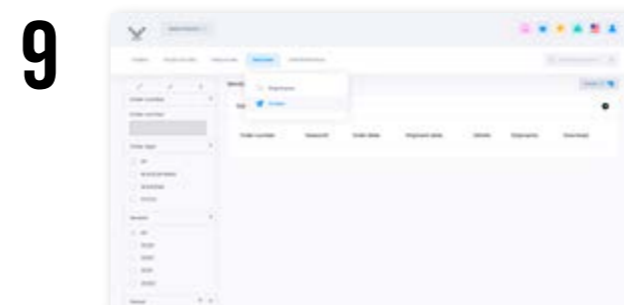

Click on an article and then you will see in the next overview whether the article is available in the different colors. When the box is bordered in green, the product has immediate availability and there are usually at least 10 pieces in stock. If the quantity in stock is less than 10, the box is bordered in orange. If the product is not available immediately but will be available for shipping in the next four weeks or less, a small “i” is visible in each box with the estimated week of delivery. If a specific size is not shown, it is no longer available. Simply input your desired quantity in the box, and then click on “Add to my cart”.

**7** Repeat steps 5 and 6 for each article you would like to order. Your orders will be placed in your cart. To finalise your order, click on your card and select “Place my order”. After inputting a delivery address,

if it is different, click on “Confirm order” to complete the transaction. You will receive an order summary by email.

You can also download product images, action shots, workbooks, logos, videos, and our Service Guide. For any of those, just click on the left menu area on “Resources” and open the desired menu item. There, you can download a wide variety of materials.

Afterward, you can look at your order again, print it out, or download the associated product images for your order. Click here on “Service” and “Order”. Here, you see all of your orders. Clicking on “Download” allows you to download your order sheet or the associated product images.
