CONTENT

Dieses Druckerzeugnis ist mit dem
Blauen Engel ausgezeichnet.

The Blue Angel is the ecolabel of the federal government of Germany since 1978. Products and services that have been awarded the Blue Angel ecolabel are more environmentally-friendly than other comparable, standard products and services. The requirements set by the Blue Angel place a particular focus on examining the impact that products and services have on the environment: on the climate, resources, water, soil and air. These tests also focus on their impact on people.

We offset CO₂ emissions of our workbooks with certified climate-protection projects. To that end, all CO₂ emission sources are measured. That includes paper pulp, paper production, as well as printing plates and ink that are used for printing. CO₂ emissions that are created in printing are offset by certified climate-protection projects in other areas. Every order entered has an individual tracking number that is integrated into the upper logo. With this ID, the climate neutrality of the printed product from the point of ordering to the offset with CO₂ can be traced.

BLACK LIGHT

THE LIGHTEST SPEED TOURING SYSTEM

DNA

THE FASTEST RACE SYSTEM

BLACKLIGHT SYSTEM

Blacklight – The Lightest Speed Touring System.

For speed aficionados among alpinists, fitness-oriented ski tourers, and mountain endurance athletes, every minute and every gram counts. They calculate vert racked up per hour and compare their performances on the mountain. Ski touring becomes a workout and serves to strengthen physically or to push a performance limit. Athletes succeed at hitting breathtaking altitude speed records. The credo for our Speed products proclaims: Total focus on premium materials for lightness, speed and reliability. #speedup

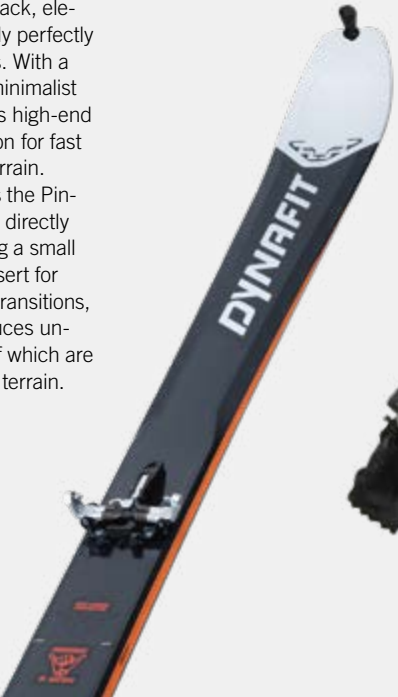

BLACKLIGHT BOOT
61920_0112

The Blacklight boot is the carbon fiber version of the new TLT X boots and is targeted at ambitious ski mountaineers. 990 grams and a cuff rotation of 60 degrees bring lightness and freedom of movement to your climb. The Twistfit-system perfectly envelops foot and heel and thus guarantees stability on the descent. Whether several thousand meters of vert in a day or a challenging expedition up an 8000er: The Blacklight is the boot of choice for big challenges where total reliability is demanded.

BLACKLIGHT PRO SKI
48493_6140

Blacklight is not just a product name. It is a promise! Black, elegant, light and technically perfectly tuned for personal bests. With a width of 80 mm and a minimalist weight of 910 grams, this high-end touring ski is your weapon for fast climbs on challenging terrain. One featured highlight is the Pin-Skin System: The skin is directly anchored to the ski using a small pin and the matching insert for that. This saves time in transitions, increases glide and reduces unnecessary weight – all of which are essential on challenging terrain.

MEZZALAMA CRAMPON
48275_0915

Fast and durable: This superlight hybrid racing crampons is suited for ISMF races, combining the durability of steel in the front points with the lightness of aluminum points in the back. This crampon comes equipped with the new DYNAFIT patent-pending tool-free adjustment technology and the front anti-balling system, and can be folded and stashed compactly.

SPEED 20 BACKPACK
49010_4490

The new Speed 20 backpack offers all kinds of room with its 20 liters, even though it weighs in at just 460 grams. It has all the features needed for fast climbs. New is the Safety Box now accessible from the outside with a zipper system. A new shoulder strap construction has an ergonomic design with extra pockets for flasks.

TLT HELM
48273_0521

+
SPEED GOGGLE
49917_0910

Get maximum protection and a full field of view on the mountain with the perfectly coordinated TLT Helmet and Speed Goggle system. This ultralight TLT Helmet offers maximum safety with triple certification covering skiing, climbing and mountaineering, as well as cycling, plus numerous additional features. At just 59 grams, the Speed Goggle is a total lightweight, plus it ensures perfect vision with its patented Anti-FogShield, even in warm conditions.

DNA

SYSTEM

DNA the name of the new collection, stands for the unmistakable tie between the DYNAFIT brand and racing. Speed and lightness are embodied in the brand's DNA. With this new collection, DYNAFIT is launching technical, weight-optimized products to achieve personal bests on the international skimo race scene.

DNA - The Fastest Race System.

DNA SKI

49705_6606

The new DNA touring ski weighs in at an ultralight 690 grams and has impressive durability for races, lending outstanding downhill performance. Compared to the DNA Pro, the DNA ski is tuned somewhat softer and thus is more forgiving. The DNA ski consists of a Paulownia Race wood core and a UD carbon fiber top and bottom layer. This offers increased tensile strength and more durability while still maintaining the same low density. Developed by World Cup athletes for demanding ski mountaineering racers and pros.

DNA BOOT

61912_9269

Its 810 grams, a shell construction of carbon fiber and the innovative Twistfit closure system combine for intuitive, reliable handling: The DNA ski touring boot is geared toward pro racing athletes and ambitious ski touring athletes to whom not only every gram counts, but also reliability when racing.

DNA POLARTEC®

ALPHA® JACKET

M 71594_0911

W 71595_0911

+

DNA POLARTEC®

ALPHA® PANTS

UNI 71603_0911

Extra protection from wind and cold: The DNA Polartec® Alpha® jacket and pants can be worn over race clothing as an outer layer, lending you comfortable warmth with good breathability. The reflective print ensures better visibility at twilight. One featured highlight of the jacket and pants are the magnetic ends on the zipper that it can be closed rapidly and easily, even with gloves on.

The pants are equipped with two full-length zippers, meaning they can be pulled on over the race suit in seconds.

DNA BINDING

49169_9180

Low weight combined with the highest durability – that is precisely what is essential for skimo athletes to dominate in international races. Thanks to optimized bionic design and a combination of milled aluminum and carbon fiber materials, the DNA binding weighs in at an ultralight 96 grams. On the descent, the binding wins you over with strong performance and excellent power transfer to the ski. The DNA binding also offers impressively good ergonomics and intuitive handling in transitions. The binding also has a version with brakes – the DNA+ is our ultralight ISMF-compliant Race binding. A binding by athletes, for athletes. #speedup to new personal bests.

DNA CRAMPON

48274_2471

Developed for high-performance ski mountaineering: With the new DNA crampon, DYNAFIT is launching the lightest racing crampon on the market. This DNA crampon at light 295 grams is made completely of aluminum. The crampon's adjustment system, patent pending by DYNAFIT, allows athletes super easy, fast adjustments without the need for extra tools. The DNA crampon attaches quickly to ski touring boots and, after use, just folds together compactly in seconds to stow in a pack.

OVERVIEW
FURTHER INFORMATION

YOUNGSTAR

With our new Youngstar Collection, we have introduced to the market the very first ski touring system specially for kids and youth. The system consisting of hardware and an apparel collection is simple and intuitive in handling and use and thus particularly well-suited for the next generation.

YOUNGSTAR – Your Quality Family Time.

YOUNGSTAR SKI SET
48497_2010

With the Youngstar ski touring set, DYNAFIT is delivering a perfectly coordinated and pre-mounted setup including skis, bindings and skins. The Youngstar skis are light, forgiving, and feature simple handling, and are available down to a size of 120 cm.

Our ST Rotation Lite 7 binding comes mounted on it with its patented pivoting toe piece – the safety binding for kids and youth that is based on the superlight, time-tested Low-Tech System. The binding can be operated with ease and quite intuitively. The release function is absolutely reliable which in the case of a fall is particularly essential. The ST Rotation Lite 7 also offers a release value of 2.5 to 7 and thus is well-suited for even very lightweight ski touring little ones.

The set is rounded out with the Speedskin Youngstar. Unpack & Ski.

**YOUNGSTAR INFINIUM™
INSULATION JACKET**
71736_8051

The new Youngstar INFINIUM™ Insulated jacket offers 2-in-1: With the use of GORE-TEX INFINIUM™ fabric with Wind-stopper Technology, the jacket is weather resistant and reliably protects youngsters from wind and light snow. Extra PrimaLoft® insulation also ensures cozy warmth even on colder days.

**YOUNGSTAR
3-LAYER PANT**
71738_8051

The new Youngstar 3-layer pants are very waterproof with a waterproof rating of 20,000 mm, keeping the next gen of ski touring enthusiasts dry even in heavy snowfall or when romping in the snow. A highlight of the softshell pants are the removable suspenders as well as the adjustability using hook-and-loop closure at the waist. This allows the size of the pants to be easily changed based on changing needs of kids and youth.

YOUNGSTAR POLE
49454_2090

The Youngstar Pole is the first ski touring pole developed by DYNAFIT just for children and youth. This adjustable aluminum pole can be quickly and easily adjusted in length from 85 to 115 cm, weighs 210 grams, and offers a cork grip for a comfortable feel in hand.

YOUNGSTAR BOOT
61926_6535

The Youngstar Boots are the first ski touring boots developed by DYNAFIT for kids and youth that has been designed just for the anatomy of the little ones' feet. Plus, they are available down to a size 21.5 MP. These ski touring boots are easy and intuitive to use and enable a natural and particularly energy-saving walking motion at a sensationally low weight of 930 grams. On the descent, it offers kids' feet the necessary stability and support for fun and safety on-piste and in the backcountry.

RACE

HIGH SPEED, THE LIGHTEST, ATHLETIC, COMPETITION

Racing is in our DNA – DYNAFIT is born from competition-oriented ski mountaineers and makes its products with the goal of assisting you in achieving your highest performances.

The equipment has been developed by athletes and tested in competitions.

SPEED

RELIABLE, LIGHTWEIGHT, HIGH ALPINE, UNCOMPROMISING

Whoever heads out on alpine ski tours or SPEED tours must be able to rely 100% on their gear! DYNAFIT offers the ideal performance-to-weight ratio to meet the highest demands on alpine terrain.

TOUR

VARIABLE, LIGHT, SAFETY, DURABLE

Whether it's a day or multi-day adventure, DYNAFIT recognizes the needs for a ski tour. We have the complete product assortment to cover you head-to-toe for a great ski tour. Our assortment not only looks good, but most importantly, our gear meets all safety standards!

YOUNGSTAR

CHILD'S PLAY TO OPERATE, 100% SAFE, QUALITY FAMILY TIME

DYNAFIT has now made ski touring for the entire family possible – all together and having lots of fun. The YOUNGSTAR System includes kid-friendly hardware as well as a functional, stylish apparel collection. The focus of all products is on safety and easy handling for a child-friendly first step into the world of ski touring.

FREE

HOJI, POWER, CERTIFIED SAFETY

Authentic FREE tourers live by the motto, "Earn your turns!" Freeride gear by DYNAFIT combines lightness suitable for long climbs with uncompromised downhill performance for challenging descents.

49704 DNA PRO SKI

The hardcore professional race ski from DYNAFIT weighs a mere 690 g. In comparison to the DNA Ski, the Pro version has an even stiffer flex and a 3 meter longer radius.

FEATURES

- Race Finish
- Race Carbon Technology
- Sidewall-Cap Construction
- Single Radius
- **Carbon-Isocore-Paulownia Ultralight Construction (USP)**

MATERIALS

Ski Core: Isocore Paulownia Ultralight
Others: UD Carbon

NEW 6604 neon yellow

PERFECT SYSTEM

Length in cm	162
Weight	690 g
Radius in m	24
Shape in mm	94-64-79
Tip Rocker in mm	230

A

49705 DNA SKI

NEW

New competition ski from DYNAFIT - in comparison to the DNA Pro, slightly softer and therefore more forgiving. The DNA ski has a short radius and a slightly longer rocker for better float in powder snow.

FEATURES

- Race Finish
- Race Carbon Technology
- Sidewall-Cap Construction
- Single Radius

MATERIALS

Ski Core: Isocore Paulownia Ultralight
Others: UD Carbon

Tip Rocker in mm	230	240

A+B

49706 MEZZALAMA SKI

NEW

Built for Grand Course races. In comparison to its predecessor, the new Mezzalama ski has been constructed with a slightly wider shovel, a longer tip rocker and a shorter radius. This makes the ski more forgiving, and saves energy on descents.

FEATURES

- Carbon-Glasfiber Technology
- Race Finish
- Sidewall-Cap Construction
- Single Radius

MATERIALS

Ski Core: Paulownia Speed Core
Others: Carbon Speed Stringers

LIFETIME GUARANTEE

HANDMADE IN GERMANY

**ALL DYNAFIT BINDINGS PURCHASED FROM NOVEMBER 1st, 2019
WILL COME WITH A LIFETIME GUARANTEE.**

**The DYNAFIT LIFETIME GUARANTEE covers all defects in material
and workmanship on all DYNAFIT bindings.**

If you register your DYNAFIT binding under
www.dynafit.com/lifetime-guarantee, we will upgrade your
guarantee from 2 to 10 years – which is equivalent to the lifetime
of a ski touring binding.

Damages caused by normal wear and tear, misuse, modification,
unauthorized repairs or abuse are not covered by this guarantee.

49155 MODULAR MOUNTING FRAME

9999 uni

Frame for modular assembly jig.

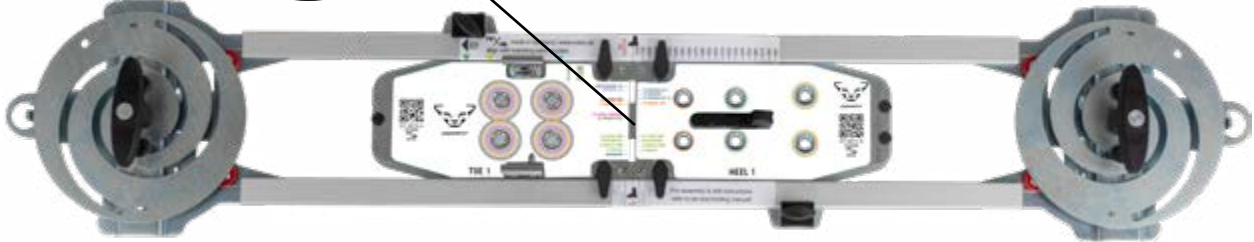

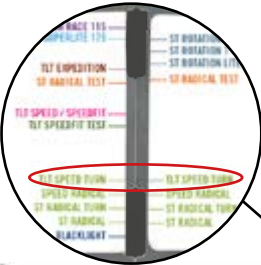

08-0000049155

EXAMPLE

Mounting of the TLT SPEED TURN binding:

1. The Mounting Frame is required for drilling all bindings
2. Selection of the devices needed.
(In the picture TOE 1, HEEL 1)
3. Insert the Toe and Heel devices into the Mounting Frame.
4. Check for correspondence of the guiding lines, which need to meet at the same height.
5. Select the correct drill holes using the font color of the binding.
(In the picture: green)

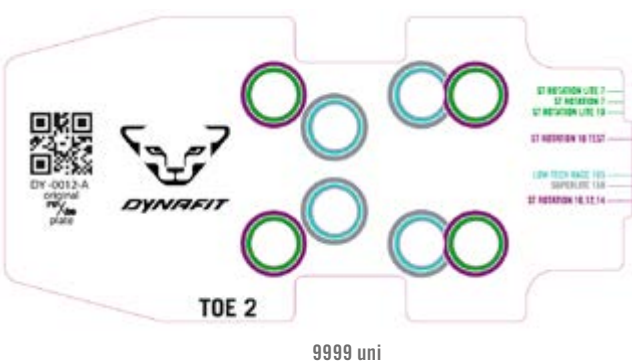

47613 MOUNTING DEVICE - TOE 1

Low Tech Race 115, Superlite 175, TLT Expedition, Blacklight, Blacklight Long Travel, TLT Speed, TLT Speedfit, TLT Speedfit Test, TLT Speed Turn, Speed Radical, ST Radical Turn, ST Radical, ST Radical Long Travel.

PERFECT SYSTEM

TLT X BOOT

The new TLT X continues the success story of the well-known TLT Series. TLT – Tour Light Tech – stands for speed, lightness and efficiency. Developed for ambitious ski touring enthusiasts, the TLT X is the boot of choice for big challenges where total reliability is demanded.

TLT X BOOT W
61922_3320

TLT X BOOT M
61921_3305

ULTRA LOCK 5.0

Simple transition from walk to ski mode. With the optimization construction of the Ultra Lock 4.0, the dual-function buckle now ensures a well-aligned connection between shaft and cuff without play.

TWISTFIT

The Twistfit closure system enables fast, precise fit adjustments of the boot using an adjustment dial. A full-wrap cable not only guarantees secure hold at the instep but also at the heel, thus ensuring stability on the descent.

LIGHTWEIGHT

Less weight means more performance and speed. And whoever is faster spends less time in the danger zone. Whether several thousand meters of vert in a day or a challenging expedition up an 8000er: 930 grams (1,030 g for men) and a cuff rotation of 60 degrees brings lightness and freedom of movement to your climb.

101 MM LAST WIDTH

The last width of 101 mm lends extra comfort, especially on long tours. The TLT X W offers feet sufficient room even when they may swell after many meters of vert. This guarantees optimum blood circulation for long-lasting performance, but without the loss of an athletic fit for uncompromising downhills.

LINER DYNAFITTER 5

The newly developed boot liner Dynafitter 5 W is a real lightweight. Aside from comfort and mobility, the liner offers ideal "out of the box" fit, but is also customizable if needed. It is compatible with many DYNAFIT ski touring boots.

61918 SPEED BOOT M

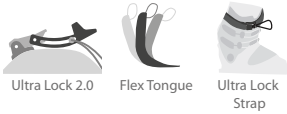

0550 nimbus/shocking orange

Weight: 1050 g
Size: 25 - 30,5 MP
Last Width: 99 mm

49426 DNA POLE

49451 MEZZALAMA POLE

NEW

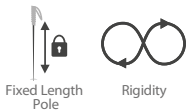

48954 BLACKLIGHT PRO POLE

49448 SPEED VARIO POLE

Weight: 133 g
Length: 115 - 145 cm

The fixed-length DNA Pole is made of 100% carbon fiber and, as the lightest model for racing and training, has an impressive minimalist design at 133 grams

MATERIALS

Grip: Nordic Grip
Main: Carbon
Tip: XC Carbid Tip, Butterfly Basket 2.0

Weight: 154 g
Length: 115 - 145 cm

The fixed-length Mezalama Pole was developed for ski touring enthusiasts who like their adventures on high mountains to be fast and light. The pole is made of two different materials: The upper section uses carbon fiber, while the Titanal lower section provides protection from rocks.

MATERIALS

Grip: Nordic Grip
Main: Carbon, Titanal
Tip: XC Carbid Tip, Butterfly Basket 2.0

Weight: 152 g
Length: 110 - 140 cm

The Blacklight Pro carbon pole is a fixed-length pole that is light and strong. It excels on fast alpine tours with its extended grip zone, and combines the two stiffest materials on the market to provide the best possible support on your mountain adventures.

FEATURES

2in1 Materials

MATERIALS

Grip: 2K Grip
Main: Carbon, Kevlar Carbon

Weight: 208 g
Length: 105 - 145 cm

The lightweight Speed Vario touring pole is made of 100% carbon fiber. Length adjustment is simple and reliable, thanks to the Vario 2 adjustment system.

TLT HELM

Twice as nice? Thrice is even better!

The new TLT Helmet newly launched from DYNAFIT is not only an ultralight, stylish and low-profile, but also boasts a triple certification. Meaning it satisfies the helmet standards for skiing, climbing/mountaineering, as well as cycling. The helmet is also approved by ISMF and is well-suited for challenging skimo races with its light, yet robust construction. Together with the new DYNAFIT goggles, mountain athletes now have the perfectly coordinated system of helmet and eye protection – for the highest performance without compromises.

TLT HELMET
48273_0521

TLT HELMET
48273_8885

TLT HELMET
48273_0912

LIGHTWEIGHT

With its construction using an EPS inner lining and an “in-mold” polycarbonate shell, the TLT Helmet, weighing in at just 300 grams, offers an extraordinary balance of minimal weight and maximum protection.

TRIPLE CERTIFICATION

The TLT Helmet comes with triple certification: It fulfills all of the standards for skiing, climbing and mountaineering, as well as cycling, thus taking the safety for all modern multi-sport adventures to a new level.

TLT HELM-GOGGLE-SYSTEM

Together with the brand-new DYNAFIT goggles, athletes have a perfectly matched, ultralight system for ideal protection for being out on the mountain with a full view – no matter what your discipline. Helmet and goggles guarantee the best possible fit with each other so that annoying slipping about of goggles is now a thing of the past.

REMOVABLE VISOR

The adjustable and removable visor serves to shield from glare and is compatible with our goggle system: It guarantees the goggles fit snugly without slipping around or snapping back on the helmet. When using without a visor, stretch straps prevent the goggles from slipping back on the helmet.

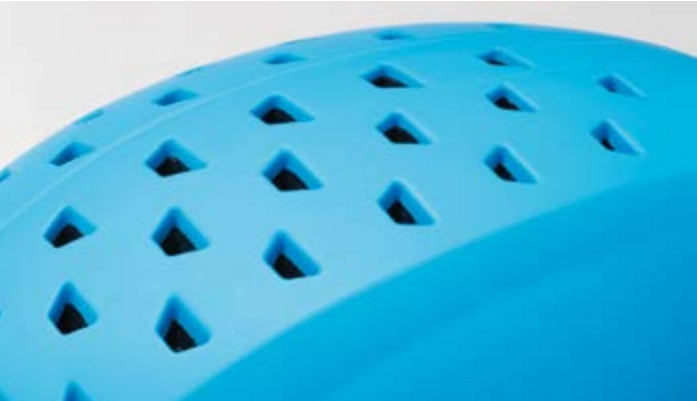

MAXIMUM COMFORT THANKS TO PRECISION FIT

Using a small wheel at the back of the head, the helmet – available in two sizes – can be perfectly adjusted for individual fit. Additional adjustment options come from the head/chin strap to guarantee a precision fit and thus maximum safety.

OPTIMUM VENTILATION SYSTEM

The extraordinary ventilation system with numerous openings ensures great comfort and breathability, even on the climb.

48273 TLT HELMET

NEW

8211 silvretta

Weight: 300 g
Size: 53-58 cm (S/M), 57 - 61 cm (L/XL)

LIFETIME GUARANTEE

HANDMADE IN ITALY

ALL DYNAFIT EYEWEAR PURCHASED FROM FEBRUARY 1st 2022, WILL COME WITH A LIFETIME GUARANTEE.

The DYNAFIT LIFETIME GUARANTEE covers all defects in material and workmanship on all DYNAFIT eyewear.

If you register your DYNAFIT eyewear under www.dynafit.com/lifetime-guarantee we will upgrade your guarantee from 2 to 5 years – which is equivalent to the lifetime of an eyewear product.

Damage caused by normal wear and tear, misuse, modification, unauthorized repairs or abuse are not covered by this guarantee.

#SPEEDUP

ATHLETE VISION

LIFETIME GUARANTEE
HANDMADE IN ITALY

EYE-WEAR

With a full field of view and not a single gram too many on your face: That sums up the brand-new DYNAFIT eyewear collection that ideally rounds out our perfect system. And you'll really be ready to hit the slopes and mountain trails with a vengeance. All sunglasses and goggles are as you would expect from DYNAFIT – extremely light so that you hardly feel them when wearing them. The Divel Optics premium lenses from Italy are used for the sunglasses and ensure you have a perfect field of view and get reliable eye protection from damaging UV rays, wind and dust. The wide field of view guarantees the ultimate panorama, and you never lose sight of your surroundings. And on top of all that? All eyewear is handmade in Italy, and we offer our DYNAFIT Lifetime Guarantee of 5 years on them. Feel nothing – see everything. That is the new DYNAFIT Eyewear Collection.

TECHNOLOGY

for sunglasses and goggles

PHOTOCHROMIC

Intelligent lenses for optimum vision in any light. The photochromic, adaptive sunglass technology means lenses adjust quickly and automatically to light conditions, ensuring the best vision in any weather.

REVO

Revo sunglass technology increases contrast, filters the entire light spectrum, and brings out the intensity of colors. For reflection-free vision.

SOLID

The All Black lenses protect reliably from UV-light and are also super stylish.

TRAIL

The Trail sunglasses are the stylish all-rounder with a full 360° frame – ideal for trail running on any terrain or for a ski tour.

ULTRA

At just 31 grams, the Ultra Sun-glasses are the lightest performance eyewear in the collection with half-rim frames, perfectly suited for Speed Touring.

SKY

The Sky is the model of choice for everyone who wants to head high up the mountain: These glacier glasses have side shields and a brow pad piece for perfect protection so the especially strong high-altitude sun can't damage eyes. The removable brow pad lends extra comfort and makes the glasses great for everyday wear, too.

FRAME VENTILATION

The frame's ventilation system makes certain that air can constantly circulate and thus prevents fogging up.

LENSES

The sunglass lenses can be easily lifted out of the frames and, as needed, swapped out.

GRILLAMID TR90

This material is extremely light and especially flexible, which makes the glasses more resistant to damage.

EYE-WEAR

See everything – feel (almost) nothing: With both the TLT and Speed goggles, DYNAFIT is launching two ultralight goggles for demanding ski touring enthusiasts and ski mountaineers who place value on lightness and at the same time demand performance. Thanks to the wide field of vision, you always have your surroundings in sight – even on speedy downhill. Plus, your eyes have total protection from UV rays, snow, wind and weather.

LENSES

for Goggles

HYDROPHOBIC LENS
The hydrophobic lens treatment repels water, dirt and oil.

ANTI-FOGSHIELD
The Anti-FogShield with double-glass technology patented by DYNAFIT prevents fogging up and guarantees the best possible field of vision during high-intensity hill climbing and descents.

TLT GOGGLE
TLT goggles feature a unique frame that was made using a 3D printing process. That creates a maximum reduction in weight and a savings in materials of 30% compared to traditional frame materials. At just 63 grams, the TLT goggle is hardly to feel.

SPEED GOGGLE
The Speed Goggle is at just 59 grams the lightest ski goggle in the world. Its frameless design and patented anti-fog shield with double-lens technology guarantees a maximum field of view.

TLT HELMET COMPATIBLE
Both goggles coordinate perfectly for wearing with the new TLT Helmet using the TLT Strap. This gives optimum protection and a full field of view when out and about on the mountain. Helmet and goggles guarantee the best possible fit with each other so that goggles annoyingly slipping about is now a thing of the past.

CLASSIC EYEGLAS RETAINER + TLT STRAP
The eyeglass retainer has silicon grippers on the inner surface, guaranteeing a firm fit on your head without annoying slipping about. For a perfect match with the TLT Helmet, the classic eyeglass retainer can be swapped out in seconds with the practical TLT Strap. This is then clipped in directly to the side of the helmet and ensures ideal hold and that extra bit of a comfort.

49909 TRAIL PRO SUNGLASSES

NEW

0910 black out/white

activated lens

Weight: 34 g
Lens: Photochromic, Cat 1-3

CORPORATE SOCIAL RESPONSIBILITY

We see it as our duty to equip passionate mountain sport athletes with innovative, premium products for unforgettable experiences in the outdoors. In doing so, it is a given for us to also assume responsibility – certainly for the safety of the athletes, but also for protecting our environment and fellow human beings.

Corporate responsibility comprises not only sustainable business practices along the entire value chain but also equally transparent communication with all relevant stakeholders in order to continually learn and improve.

ENSURING OUR MATERIALS AND PRODUCTS ARE SAFE FOR BOTH HUMANS AND ANIMALS, AND FOR THE ENVIRONMENT IS OUR TOP PRIORITY.

FAIR WORKING CONDITIONS

The largest portion of our apparel is produced in Asia. The global centre of competence plus cutting and sewing expertise is located there, including some of the most efficient production partners. This means some of our factories are far away from us, making it harder for us to monitor each step of the process. Achieving fair working conditions in these factories means we have to pick the best partners and work with them to help them reach our high standards for working conditions.

All our suppliers have to sign and commit to our **CODE OF CONDUCT**, a document that sets the social and ethical standards to be respected in all facilities manufacturing our products.

FAIR WEAR FOUNDATION

To ensure we are always putting the well-being of our associates first, we also partner with the most rigorous labour conditions expert in textiles that we know: Fair Wear Foundation. Fair Wear Foundation is an independent non-profit organisation with the mission to improve working conditions globally in the textile and apparel industries. We have been working with Fair Wear Foundation since 2013 to ensure the well-being of workers involved in the manufacturing of our textile products. FWF helps us monitor working conditions and audit our factories, it supports us in our relations with our suppliers, and it

ensures we are subject to an annual review. In 2017, the FWF first assigned us the leader status – a level only given to brands who are doing exceptionally well and operating at an advanced level. FWF raises the bar with its requirements every year, and we're continually being challenged to do more to satisfy these increased standards.

We're proud to say that in 2021 we've received the leader status for the fifth time in a row.

CURRENTLY, 93% OF OUR TEXTILE PRODUCTION IS UNDER MONITORING FOR FAIR WORKING CONDITIONS

(the factories have either been audited by third party experts in workers' rights or are located in low-risk countries such as Italy and Germany).

Find out more about Fair Wear Foundation at fairwear.org.

HIGHER CHEMICAL STANDARDS

One of our priorities is making top performance products that are safe for both humans and the environment. Our goal is to control the entire lifecycle of our products – from raw material, through the production process, to the finished product. Our products are manufactured according to the

OBERALP CHEMICAL POLICY. The document establishes a formal process to ban or limit the presence and use of hazardous substances in our products and production processes. It is even stricter than the legal limits and thus guarantees safety and compliance. Our chemical policy is a central part of the Conditions of Purchase with our suppliers, and it's mandatory at every stage of the production and distribution process.

PROUD TO BE A bluesign® PARTNER

We also work with expert partners and third-party certifications, such as bluesign®. We have been bluesign® system partners since 2011 and today a large portion of the fabrics used in our products are certified. bluesign® seeks to eliminate hazardous substances starting at the first stage of the manufacturing process and guarantees a safe and clean supply chain for the environment and for everyone involved at every step. Additionally, we work with an external and independent chemical laboratory to conduct tests on our products every season to ensure they are meeting our strict internal standards.

PFC-FREE DURABLE WATER REPELLENTS (DWR)

Perfluorocarbons (PFCs) are a type of chemical used to make products resistant to water, grease and stains. PFCs guarantee best-in-class performance for our technical apparel that needs to be both water-repellent and still allow humidity to exit. The problem with PFCs is that they are linked to negative health effects in humans, animals and nature. Both during the production and use phases, PFCs are released into the environment and are persistent. This means they degrade very slowly in nature and can also travel easily through water and wind. They then end up in our food chain. For this reason, since 2014 we have completely eliminated long-chain PFCs (C8) from all our products. All our water-repellent (DWR) products now either contain shorter-chain PFCs (C6) or are 100% PFC-free. We're continuously working to increase the number of PFC-free DWR treatments in our products.

For our most technical products to be used in extreme weather conditions, it is necessary to apply C6 DWR treatment to ensure full weather protection and warmth. We are continuously investing to further reduce the use of C6-chemicals in our fabrics and significantly increase the number of PFC-free products without compromising on user-safety performance. Please note that contamination from PFCs cannot be excluded.

CORPORATE SOCIAL RESPON- SIBILITY

HANDMADE
IN EUROPE

MADE IN EUROPE

55% OF ALL DYNAFIT PRODUCTS ARE MANUFACTURED IN THE ALPS.

As an innovator and developer of technical equipment and gear for mountain sports, it remains our biggest challenge to work sustainably. Social responsibility for people and nature is a given.

Fair working conditions, high quality standards, shorter transport distances – all of this saves resources and is our highest priority in our search for appropriate production facilities in Europe.

We are working constantly on shifting more production facilities to Europe. When it comes to bindings and ski touring boots, 100% of production occurs in in Germany respectively in Italy; textiles are still in large part imported from Asia. However, we pay special attention here to ensure safe and fair working conditions in all our factories.

For more information on our sustainability work, read our latest sustainability report at dynafit.com/sustainability.

PRODUCTION SITE	VALUE % (FOB)
Germany	22,5%
Italy	21,9%
Vietnam	20,0%
Bangladesh	11,3%
China	10,5%
Austria	5,6%
Lithuania	2,0%
Switzerland	1,7%
Tunisia	1,7%
Taiwan	1,1%
France	0,8%
Belarus	0,8%

MADE WITH RECYCLED CONTENT

The styles marked with “made with recycled content” contain at least 50% recycled content in their main fabrics. The recycled polyester used in our collection is mostly made from post-consumer PET bottles. Existing plastic is melted down and spun into new polyester fiber, also known as rPET. This means we reduce our dependence on petroleum and we use “waste” as the raw material.

By using post-consumer recycled plastic to create our recycled fibers, we are also diverting plastic from ending up in landfills. Studies show that the production of recycled polyester saves more than 50% of CO₂ emissions and energy compred to virgin polyester, reducing the overall environmental impact of the product. Most of the shirts made of polyester are also recyclable, meaning their fabric can be fed back into the production cycle.

RESPONSIBLE DOWN STANDARD – RDS

100 % of the down used for our products is certified based on the Responsible Down Standard (RDS). RDS is currently the most comprehensive independent certification standard for animal welfare and traceability for down globally. It guarantees that ducks and geese are treated well for their lifetimes. The certification standard examines and scrutinizes every step of the supply chain all the way down to animal farms.

RDS certified means:

- NO live plucking
- NO force feeding of ducks and geese
- NO slaughtering of animals just for down and feathers
- YES for a transparent supply chain

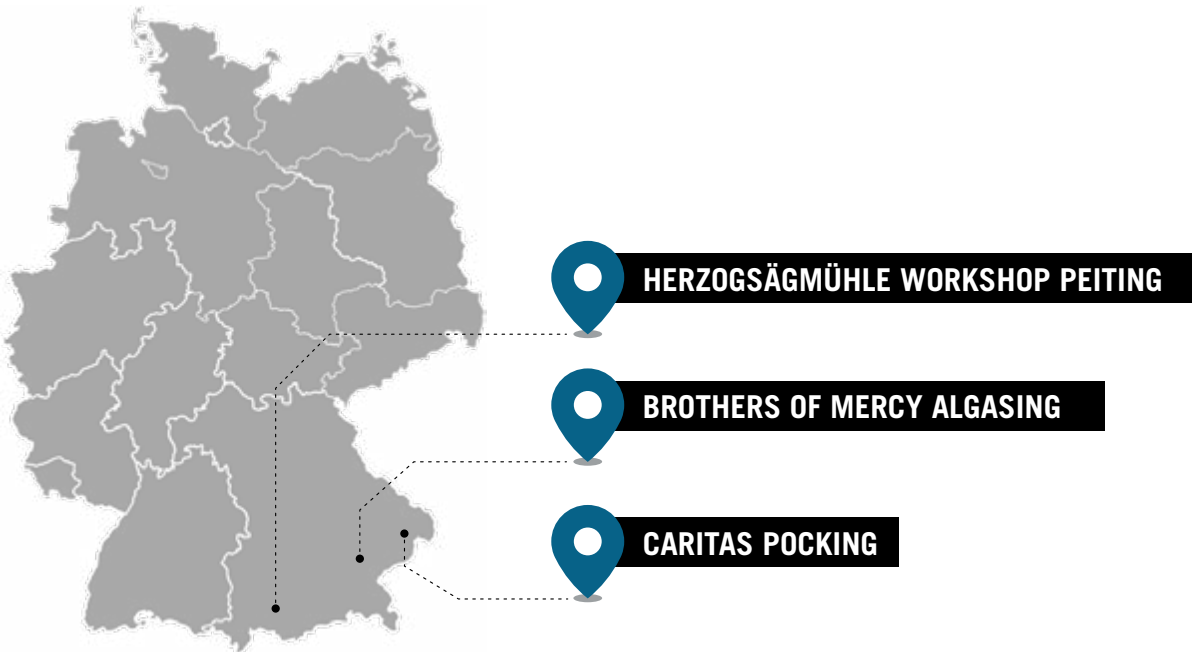

SUPPORT OF EMPLOYEES WITH DISABILITIES

In today's society, a large part of daily life is all about work, which can be a satisfying and fulfilling experience.

Since 1999, DYNAFIT has maintained a partnership with Caritas. Caritas, a nonprofit organization, gives persons with disabilities the chance to find a place in the working world. It does this by creating an environment that is friendly for those with disabilities and thus is ideally suited to the needs of every single person. Caritas thus offers persons with disabilities the opportunity to experience independence, recognition and inclusion, all of which DYNAFIT would like to make possible for them.

DYNAFIT WORKS TOGETHER WITH CARITAS ON A UNIQUE PROJECT: IN THREE FACILITIES IN GERMANY, EMPLOYEES WITH DISABILITIES MAKE OUR SKI BINDINGS. AT THE SAME TIME, EVERY BINDING IS ALSO TESTED IN OUR PERSONALLY DESIGNED TESTING FACILITIES.

We are very proud to be able to say that our bindings are 100% assembled at these organizations by employees with disabilities.

DYNAFIT AND THE SNOW LEOPARD

To DYNAFIT, the snow leopard is not only a brand symbol. Its characteristics and faculties are consistent with the values and characteristics of the company. For DYNAFIT, the snow leopard is the role model and symbol for all the characteristics and abilities that ensure a life and survival on the mountain.

THE SNOW LEOPARD DAY HAS BEEN A FIXED DATE FOR OUR COMMUNITY FOR YEARS AND HAS BECOME AN ESSENTIAL PART OF OUR COMMITMENT TO WILDLIFE CONSERVATION.

SNOW LEOPARD TRUST

Unfortunately, the snow leopard is now in danger of extinction. Thus, DYNAFIT has set the goal of helping the snow leopard. In order for this to occur professionally and sustainability, we support the non-profit organization, Snow Leopard Trust, founded in 1981. Our most successful project in this regard is most certainly the "International Snow Leopard Day."

INTERNATIONAL SNOW LEOPARD DAY

The International Snow Leopard Day has turned into a fixed date on the calendar of the ski touring community in recent years. Together, participants accumulate vertical meters for protection of the snow leopard. Each vertical meter achieved and tallied is transformed by DYNAFIT into one cent donated. In Winter 2021, due to the COVID-19 pandemic, the International Snow Leopard Day was not able to take place in usual format. Instead, more than 45 DYNAFIT athletes from 10 different countries headed out on a ski tour on March 16 in the name of the snow leopard to work hard collecting vertical meters. The result was more than **113,415 meters of vert covered**, which turned into a total of **EUR 11,341** (10 Cent / vertical meter), all of which was donated to the Snow Leopard Trust.

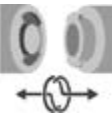

Peter Bolliger

BINDINGS

AUTO / MANU LOCK
Binding is available in two versions:
Auto: Climbing-oriented version with simplified locking.
Manu: Manual locking (meets ISMF standards).

BAYONET LOCK
Due to the perfect bayonet lock of the heel unit, the power transmission between binding and ski is extremely strong and direct.

CARBON FIBER
Weight-optimized construction that ensures maximum rigidity at a low weight with carbon fiber materials.

EASY LOCK BRAKE SYSTEM
The best and most user-friendly brake operation due to an automatic lock in walk mode.

FULLY ADJUSTABLE RELEASE (FAR)
Maximum safety for ski tourers with both upward and lateral release adjustability.

GUIDED NOTCH ENTRY
Step-in aid for centering the boot in the toe piece.

HUB CENTERING
“Hub centering” system in all bindings with a rotation toe piece makes it child’s play for users to align the boot in a neutral position and then lock the lever for walking uphill.

LIGHTWEIGHT
Above-average weight optimization for this area of use.

LOWEST STAND HEIGHT
Very low stand height for an optimal downhill feeling.

OPTIMIZED POWER TRANSFER
Maximum power transfer between binding and ski thanks to a wide base with an optimized drill-hole pattern.

ROTATION TOE PIECE
Patented DYNAFIT pivoting toe piece evens out impacts from the dynamics of skiing that affect skis and bindings. The binding release function is thus more reliable and effectively counters unwanted pre-release.

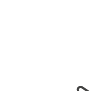

SPEED STEP CLIMBING AID
Climbing aids can be quickly and easily used with a pole.

SPEED SWITCH FUNCTION
Extremely intuitive operation of the race brake with one hand for transitioning between ski and walk modes, plus functionally integrated climbing aid.

STEP-IN SIDE TOWERS
Step-in side towers work as guiding elements for the boot and make the step into the toe piece 30% easier. At the same time, the side towers increase lateral stability during the descent.

TOOL-FREE LENGTH ADJUSTMENT TOE PIECE
Tool-free length adjustment for fitting various boot sole sizes. This makes adjustment even more time-efficient.

CRAMPONS

FAST ADJUSTMENT
Fast, simple adjustments without tools thanks to minimalist size adjustment (Dynafit pat. pend).

FOLDABLE
Compactly foldable to require minimal space demands in a pack thanks to flexible, sturdy connection cables made of stainless steel.

LIGHTWEIGHT
Ultralight construction of high-strength materials.

BOOTS

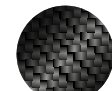

CRAMP-IN SYSTEM
Product compatible with the DYNAFIT Cramp-in crampon. Mounting on the sole of the boot must be done by a specialty dealer.

DRIVING SPOILER 2.0
With the help of the Driving Spoiler 2.0 a stiff connection of the shell and shaft is created, which contributes significantly to the downhill performance of the boot.

FLEX TONGUE
Patented technology: Ski- and walk modes are linked to the rear lever by an internal cable. The boot is opened and closed with just one hand motion.

FULL CARBON CONSTRUCTION
100% made of carbon fiber.

HOJI LOCK SYSTEM
An innovative tongue design and the combination of synthetics with different mechanical properties result in an excellent range of motion in the ascent as well as best downhill characteristics.

HOJI SINGLE LOCK
Secures the boot shell with a one-hand move. The Ultra Lock Strap is closed manually with a second hand motion.

ISO 9523
These boots are compatible with tech and frame touring bindings.

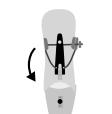

LIGHTWEIGHT
Very lightweight.

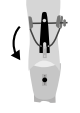

PINTECH SYSTEM
Innovative system with pins directly on the boot. To enable faster and easier binding entry and exit.

RACE LOCK
The Race Lock System allows a transition between walk and ski modes with just one hand. The lever system is connected with the boot cuff with a Dyneema cable where an intuitive, patent-pending hook closure system is used.

RACE LOCK BY PIERRE GIGNOUX
With the ultralight, intuitive Race Lock by Pierre Gignoux, just one quick hand motion links the shell and cuff and transitions between walk and ski modes.

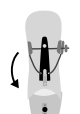

RACE LOCK PRO BY PIERRE GIGNOUX
With the ultralight, intuitive Race Lock by Pierre Gignoux, just one quick hand motion not only links the shell and cuff and transitions between walk and ski modes; the interior lacing system is also pulled snugger to increase downhill performance.

RIDE TONGUE
An intuitive tongue construction that increases rigidity when locked without negatively affecting the Flex Progression.

SPEEDNOSE
The innovative Speednose with a shorter toe box and a pivot point set back by 4 mm compared to a traditional nose make ascents even more efficient. Reduced weight, a shorter sole length and a maximized rotation movement are the result of this development.

SKI WALK SYSTEM BY PIERRE GIGNOUX
A system by Pierre Gignoux developed specifically for racers. Fast and easy operation during a race.

TWISTFIT
The Twistfit Closure System enables fast and precise personalization of the boot’s fit using an adjustment knob. The cable that wraps around the cuff guarantees a secure fit not only across the foot’s instep but also at the heel.

ULTRA LOCK 2.0
The articulated cuff buckle Ultra Lock 2.0, which, when compared to the previous version, reduces lateral snag, unhampering the transition from SKI to WALK mode and reverse.

ULTRA LOCK 4.0
The dualfunction buckle enables the cuff to be opened/closed and allows a user-friendly change from walk mode to ski mode. The ratchet buckles allow micro regulation for precise adjustment and enhanced comfort.

ULTRA LOCK 5.0
The evolution of the Ultra Lock 4.0 with increased rigidity and improved leverage.

ULTRA LOCK YOUNGSTAR
Developed specifically for the anatomy and the needs of young ski touring enthusiasts to offer easy handling with a little effort.

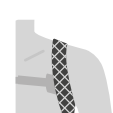

WOMEN'S FIT
Developed specifically for a woman's anatomy and the needs of female ski mountaineers.

BACKPACKS

- 

ANATOMICAL AIR MESH BACK
Anatomically formed back with lightweight, breathable air mesh material.
- 

ANATOMIC CUT FOR CLOSE FIT
Anatomically designed pack for carrying close to the body.
- 

BREATHABLE SHOULDER STRAPS
Breathable shoulder straps thanks to special construction with performance materials.
- 

HELMET ATTACHMENT
Secure helmet attachment on the backpack exterior.
- 

MAGNETIC SKI FIXATION
Additional ski attachment. Enables secure attachment of the skis on a pack.
- 

MAIN COMPARTMENT FULL SIDE ZIP
Very accessible main compartment with a full-wrap-around zipper.
- 

PADDED COMPARTMENTS
Padded pockets for protection.
- 

REMOVABLE BACK INSERT
Removable back reinforcement for more or less back protection, e.g., for additional weight optimization.
- 

REPOSITIONABLE SKILOOP
The Ski Loop can be attached to five positions of different heights.
- 

ROLL TOP
A practical roll-top closure adapts to various quantities and always remains securely shut.
- 

ROPE PARTNER SUPPORT SYSTEM
A rope integrated into the pack to assist a teammate needing help in a difficult situation during a team competition.
- 

SHOULDER ADJUSTMENT
The width at the nape of the neck can be adjusted individually using an integrated band.
- 

SIDE SKI ATTACHMENT
Lateral ski-carrying attachments.

EYEWEAR

- 

360° FRAME
The lens glass have full frames that ensure the perfect combination of fit, protection and performance.
- 

HARD COATING FINISH
The lenses have a scratch-resistant coating and are impact resistant.
- 

INTERCHANGEABLE LENS
The lenses can be swapped out as needed.
- 

180° FRAME
The lens just have frames at the forehead and nose for an even lighter design without neglecting protection and optimum fit.
- 

DETACHABLE SWEAT BAR
The Sky sunglasses come with a removable foam bar that prevents sweat from getting into the eyes.
- 

DETACHABLE SIDE SHIELDS
The Sky sunglasses have two removable side shields to ensure the best possible UV protection even in especially intense high-altitude sun.
- 

FRAMELESS DESIGN
Frameless ski goggles with an especially light design and minimal volume.
- 

ANTI-FOGSHIELD DOUBLE LENS
DYNAFIT-patented technology that prevents fogging up and guarantees the best possible field of vision on high-intensity climbs and descents.
- 

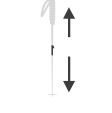

4-LAYER FOAM
Soft, flexible comfort foam with 4 layers that perfectly adapts to the shape of the face.
- 

LIGHTWEIGHT
Products with extremely low weight.
- 

3D PRINTED FRAME
Frames made with a 3D printing process. That creates a maximum reduction in weight and a savings in materials of 30% compared to traditional frame materials.
- 

TLT STRAP
For the best possible compatibility with the TLT Helmet: Shorter eyeglass retainer that is then clipped in directly to the side of the helmet and thus ensures ideal hold with extra comfort.

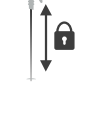

POLES

- 

ADJUSTABLE LENGTH
Adjustable ski poles.
- 

EVA GRIP EXTENSION
Grip extension with EVA foam grip. Enables individualized and flexible use on various surfaces.
- 

FOLDABLE
Pole collapses into four sections with the push of a button. Allows poles to be stowed in a pack with a length of just 42 cm.
- 

FIXED LENGTH
This product has a fixed length.
- 

PRESSURE LOCK SYSTEM
Pressure lock system for individual adjustment of pole length.
- 

ROCK PROTECTION
Durable materials and construction in the lower third of the pole to protect from rocks. Increases lifespan.
- 

RIGIDITY
Increased rigidity through the use of special materials.

HELMETS

- 

DYNAFIT HELMET-GOGGLE SYSTEM
Helmet and goggles are ensured the best possible fit with each other with the TLT Strap. Guaranteed to eliminate annoying slipping about.
- 

LIGHTWEIGHT
Light in-mold PC-EPS construction.
- 

MAGNET BUCKLE
Magnetic closure system. Simple, safe and fast operation.
- 

3 in 1 TRIPLE CERTIFICATION
Outstanding protection for ski touring thanks to triple certification covering skiing, climbing and mountaineering, plus cycling.

OTHERS

- 

ISMF
The product is certified to fit within ISMF Sporting Regulations.
- 

MADE IN AUSTRIA
Produced in Austria.
- 

HANDMADE IN EUROPE
Produced in Europe.
- 

MADE IN GERMANY
Produced in Germany.
-

A+B DEALERS
Product available for A+B-dealers.

B2B PORTAL

DYNAFIT AT YOUR FINGERTIPS

Our B2B portal is an online shop for business customers. In comparison to email or faxed orders, the platform offers an overview of real-time availability because the system is connected to our inventory management system and is updated daily. Every retailer who has been given access by us can place orders around the clock and can download marketing materials such as images, videos, workbooks, and much more. Website: serviceportal.oberalp.biz

WHY YOU SHOULD USE OUR B2B PORTAL

- Ability to order any time of the day or night, regardless of our office hours
- Deliveries FOB without any minimums
- Simple overview of available sizes and colours
- Easy, timely, and quick processing – without the need to hold on a call
- Opportunity to print or electronically archive all orders
- Downloading of images, product descriptions, price lists, catalogues (PDF format), and videos
- Ability to track shipments of orders placed
- Overview of all orders, whether placed on the B2B portal or elsewhere

HOW TO REGISTER FOR THE B2B PORTAL

1 Open a web browser to our home page dynafit.com. In the footer area, on the right side, select “B2B / PRESS PORTAL”, or input the web address serviceportal.oberalp.biz into your browser.

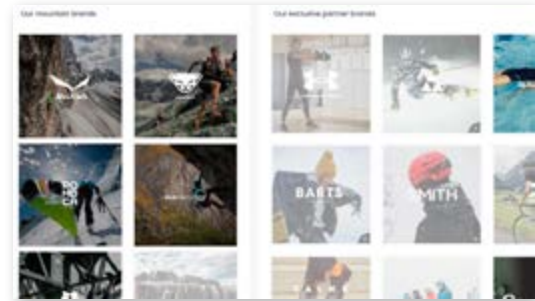

2 Fill out the new customer registration form with all the necessary information. Within 24 hours, you will receive your login details for access.

3

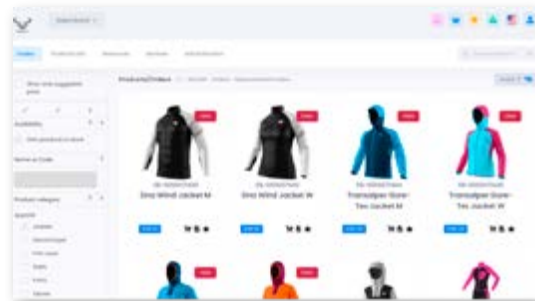

At serviceportal.oberalp.biz, a dialogue box will appear to request your login details. Input your user name and password. Click on “Log in”.

4

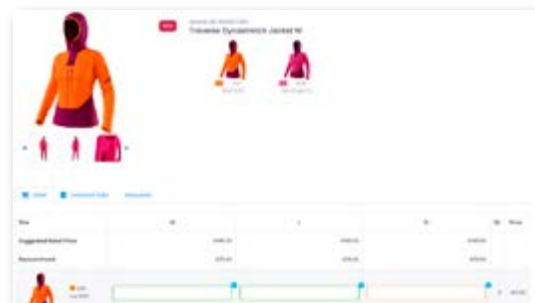

In the B2B portal, we offer all products of the OBERALP Group available for each country. First, choose the collection from which you want to order by clicking on the brand. You can select any collection for which you have access.

5

You are able to search for products by clicking on “Order” in the “Products/Orders” section and then inputting the product name (a part of the name is usually sufficient) or the product number. Click on “Search” to show all relevant search results.

6

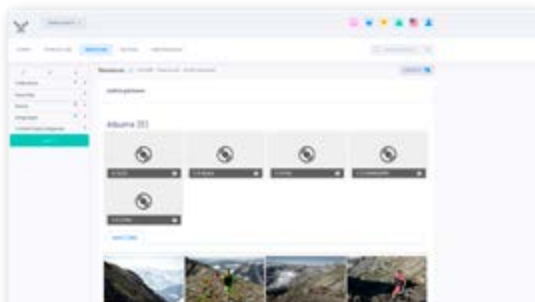

Click on an article and then you will see in the next overview whether the article is available in the different colors. When the box is bordered in green, the product has immediate availability and there are usually at least 10 pieces in stock. If the quantity in stock is less than 10, the box is bordered in orange. If the product is not available immediately but will be available for shipping in the next four weeks or less, a small “i” is visible in each box with the estimated week of delivery. If a specific size is not shown, it is no longer available. Simply input your desired quantity in the box, and then click on “Add to my cart”.

7

Repeat steps 5 and 6 for each article you would like to order. Your orders will be placed in your cart. To finalise your order, click on your card and select “Place my order”. After inputting a delivery address,

if it is different, click on “Confirm order” to complete the transaction. You will receive an order summary by email.

8

You can also download product images, action shots, workbooks, logos, videos, and our Service Guide. For any of those, just click on the left menu area on “Resources” and open the desired menu item. There, you can download a wide variety of materials.

9

Afterward, you can look at your order again, print it out, or download the associated product images for your order. Click here on “Service” and “Order”. Here, you see all of your orders. Clicking on “Download” allows you to download your order sheet or the associated product images.
